ACKNOWLEDGEMENT

The candidate takes this opportunity to express his sincere thanks to Dr. A.K. Barua, Reader in Chemistry for his guidance and constructive criticisms. He is also indebted to Dr. (Miss) Farul Chakrabarti, Lecturer in Chemistry, Bose Institute for her supervision, and valuable suggestions. He is grateful to Prof. S.M. Sircar, Director and Dr. A. Sen, Head of the Department of Chemistry, for providing laboratory facilities to carry out this work.

The candidate is thankful to Dr. B.C. Das, Institute de Chimie des Substances Naturelles, Paris, France, for n.m.r. and mass spectra and to Dr. S.C. Pakrashi, Scientist, Indian Institute for Experimental Medicine, Calcutta for the i.r. spectra. He owes much to Mr. B. Bhattacharya and to his colleagues Mr. S.K. Pal, Mr. A.S. Dutta Gupta, Mr. A. Sanyal and Mr. K. Basu for their ungrudging help in drawing the figures and structures.

Finally, the candidate offers his thanks to the Council of Scientific and Industrial Research, New Delhi for offering him a Junior Research Fellowship.
The present thesis, entitled, "Chemical investigation of some plants of the family verbenaceae" submitted for the degree of Doctor of Philosophy (Science) of the University of Calcutta, consists of the following:

Part I - Chemical examination of Lantana camara:
   The constitution of lantic acid.

Part II - Chemical investigation of Mollugo hirta:
   The constitution of mollugogenol B.

Part III - Chemical investigation of Lippia nodiflora:
   The constitution of nodifloretin.

Part IV - Steroid glucoside from Clerodendron infortunatum.
