ACKNOWLEDGMENT

The author is highly indebted to Professor A.K. Sengupta, D.Sc., M.I.E.E. (London), Head of the Department of Applied Physics, Calcutta University, for his help and guidance throughout the progress of this work.

The author expresses his heartfelt gratitude to Late Dr. D.B. Sinha, Ex-Reader, Department of Applied Physics, C.U., for originally suggesting the problem and kind encouragement and help in the present work.

The author is grateful to Dr. S.P. Basu, D.Phil, Lecturer, Department of Applied Physics for his keen interest and valuable suggestions throughout this study.

Grateful thanks are also due to Sri M.K. Joarder, Sri D.K. Chakraborty, Dr. A.K. Ghosh and Sri B. Bhattacharya of this Department of Applied Physics for their help in the preparation of this thesis.

The author also wishes to thank Ministry of Education and University Grants' Commission, Govt. of India, for financial assistance during the tenure of the work.

P.T.O.
Finally, the author acknowledges his indebtedness to his teachers, colleagues and staff of the Department of Applied Physics, who helped and encouraged him during the period of this study.
