ACKNOWLEDGEMENT

I feel my immense pleasure to express my deepest sense of gratitude and indebtedness to my supervisor Dr. Pinaki Acharyya, Assistant professor, Department of Horticulture, Institute of Agricultural Science, University of Calcutta, for his valuable guidance, keen interest, constant inspiration, healthy criticism and kind help during the entire period of my investigation and also during the preparation of the manuscript. I am grateful to him for his valuable suggestions, caring assistance and blessing bestowed on me.

I express my profound gratitude to my joint supervisor Professor Sarmistha Raychaudhuri, Professor, Department of Biophysics, Molecular Biology and Bioinformatics, University college of Science, University of Calcutta, for her wholesome advice, affectionate and generous help, constructive criticism and continuous encouragement during the tenure of this research work.

I express my sincere gratitude to UPE/UGC-Modem Biology Project, Calcutta University for providing the financial support.

I take care of the opportunity to express my sincerest regards and thanks to Professor Monoj Kumar Sadhu, ex-Head, Department of Horticulture, Institute of Agricultural Science, University of Calcutta, for his constant encouragement.

Mere indebtful thanks will not suffice to express my immense sense of gratitude to respectable teachers of Institute of Agricultural Science, University of Calcutta, for their sincere suggestions whenever I approached for their kind help during the tenure of this investigation.

I sincerely thank all the members of the Agricultural Experimental Research Farm of Calcutta University at Baruipur, 24th Parganas (South), West Bengal without whose help it would have virtually been impossible for complete and conduct my experiments.

I acknowledge the help that I received from Dr. P K Sahoo, Associate professor, Department of Agricultural statistics, Bidhan Chandra Krishi Viswavidyalaya and Dr. Nasim Ali, Assistant professor, Ramkrishna Mission Ashram, Narendrapur during statistical analysis.
I am also grateful to Dr. Samik Sengupta, Mr. Chandan Kumar Mondal, Mr. Uttam Saha, Mr. Sambit Datta and all of my colleagues at Department of Horticulture, Institute of Agricultural Science, University of Calcutta for their kind cooperation and help in assisting during my work.

I am also thankful to Dr. Ananya Paul and all of my seniors and juniors of the Department of Biophysics, Molecular Biology and Bioinformatics, for kind cooperation and suggestions during the proceedings of my thesis work.

My sincere thank goes to Mrs. Tanusri Goswami, Junior Technical Assistant, Department of Horticulture, Institute of Agricultural Science, University of Calcutta for her technical support.

I am grateful to all of my friends for their constant inspiration and support.

I regret my inability to acknowledge many others by name who helped me at various stages of my work, nevertheless, I am bound to thank them all.

Finally, I owe my encompassing debt to my affectionate Parents and my family members, without whose silent blessing, continued support, encouragement, good wishes, exemplary patience and understanding the completion of this work would never have been possible.
