ACKNOWLEDGEMENT

In the course of carrying out the research work presented in this dissertation I have received invaluable help and support from various individuals and institutions. It is the most opportune moment to convey my heartfelt gratitude to all of them.

First of all, I would like to express my immense gratitude for my Thesis Supervisor, Professor Sarmila Banerjee, Rajiv Gandhi Chair Professor, Department of Economics, University of Calcutta for her guidance and encouragement all throughout in making this work possible. Without a single bit of exaggeration, I can say that it was she whose constant support, right from the beginning and till the end, provided me academic inspiration and psychological boost to complete the thesis successfully. She allowed me to use unit level NSSO data (schedule 25.0 of 52nd and 60th Round) from her DRS library. She not only provided guidance in academic matters at every stage of the work, but helped me to sort out my extra-academic problems with great care and patience. Whenever I started considering the task stupendous, she always set an achievable target to boost up my morale and confidence. Without her disciplined and rigorous support, this dissertation wouldn’t have seen the light of the day. She has left her mark in every page of it. I am also very grateful to my Joint Supervisor Dr. Arijita Dutta, Associate Professor, Department of Economics, University of Calcutta for her rigorous support and help in every aspects of this thesis. With her extreme tenacity and pedagogical tolerance she helped me to complete the work. I am indebted to her for suggesting me the health-equity issue as a possible area of research and her tireless help at every stage of this dissertation.

My sincere gratitude is extended to Dr. Sakthivel Selvaraj, Senior Health Economist, Public Health Foundation of India and Prof. Anup Karan, Associate Professor, Indian Institute of Public Health, Gandhinagar for their valuable comments and suggestions during my internship at PHFI. I received very pertinent guidance on the extraction procedure of unit level NSSO Data from Mr. Onkar Prosad Ghosh, Director, NSSO, Ministry of Statistics and Programme Implementation, Government of India. Discussions with Prof. Mousumi Dutta of Presidency University and Prof. Diganta Mukherjee of Indian Statistical Institute helped me in clearing a number of doubts related to the methodology applied in the thesis. Sourav Datta, with his unbelievable patience, guided me in learning PERL programming language to extract unit level data. Mention should also be made of Dr. Subrata Majumder of Sundarban Mahavidyalaya and Dr. Kausik Lahiri of Surendranath College for their valuable suggestions in a number of methodological issues.

The work has been carried out with financial support from the UGC-SAP program of Department of Economics, CU, where I was associated as a Project Fellow. The other sources of financial support came from UGC-Non-NET (JRF) Fellowship of the University of Calcutta and Global Network for Health Equity (GNHE) Scholarship programme, funded by Canadian International Development Research Centre (IDRC).

I received insightful comments and suggestions from Prof. Abhirup Sarkar of Indian Statistical Institute, Dr. Subrata Mukherjee of Institute for Development Studies, Kolkata,
Dr. Prasenjit Sarkhel of University of Kalyani during the presentation of my pre-submission public seminar. Comments and suggestions from the anonymous journal referees and experts present at various conferences and workshops where different parts of the research findings have been communicated/presented have thrown new lights on the analysis. I should acknowledge Dr. Sabitri Dutta of Dum Dum Motijhil Rabindra Mahavidyalaya, Dr. Saswati Sanyal of Rammohan College, Dr. Subhra Bagchi of Vidyasagar College for Women, Dr. Sudeshna Chattopadhyay of Bidhannagar College, Dr. Joysankar Bhatyacharya of IIM Indore, Dr. Saikat Sinharoy of Jadavpur University for their proactive support. I am thankful to Dr. Simanti Bandyapadhyay of NIPFP, New Delhi for her fraternal support that made my stay at PHFI, New Delhi (during the internship) very comfortable and enjoyable. My gratitude goes to Prof. Sarmishtha Sen of Syamsundar College, Prof. Shirsendu Mukherjee of St. Paul’s C.M. College and Dr. Debjani Barman of IIHMR for always keeping trust on my ability.

Regular interactions with and encouragement from other professors associated with the DRS Centre of CU like Prof. Rabindra Nath Bhatyacharyya, Dr. Sukanta Bhattacharyya, Dr. Kumarjit Mandal, Dr. Anirban Mukherjee, Dr. Rabindranath Mukhopadhyay made every minute of my stay in the institution educative and inspiring. Of course, real sense of belonging to this place developed through the day-to-day collaboration and cooperation, sharing of both the time of frustration and the moments of euphoria with the team of fellow researchers which includes a pool of friends and comrades like Jayita Bit, Debajana Dey, Sondutta Banerjee, Sukanya Bose, Neelanjan Sen, Sayantan Bandhu Majumder and Madhurima Koley.

The office staffs of Department of Economics, University of Calcutta should be acknowledged especially for their support: Indrani Chakraborty, Tapas Dey, Barun Bagchi need special mention.

Finally, I must admit that the sustained emotional support from my parents and my elder brother Monaj provided me courage to take up this endeavor and complete the project. Their faith, blessings and cooperation helped me to concentrate in my research. If this final outcome can make them happy that would be my biggest reward.

Though all my teachers, friends, relations and mentors have extended their helps at every stage, I alone am responsible for all the remaining errors.
