Acknowledgement

There are people in the world, some of them so wonderful and edifying who make a dream becoming a reality. A reality that I hold in my hand in the form of a thesis. I would like to thank all of them.

And in particular my guide and supervisor Dr A Lourdusamy MSc, MPhil, B.Ed, Ph.D, Associate Professor, Dean of Science, Department of Mathematics, St. Xavier’s College, Palayamkottai, an amiable noble person with ever-abiding serenity who is simplicity personified for accompanying me in exploring the higher realm of research with his wisdom and knowledge.

The adorable family of my guide—Mrs Gnanam Lourdusamy, Ramya and Raj—deserve a special mention for they played a silent and supportive role in creating an ambience at home that is suitable for discussion and study.

My heart swells with a sense of gratitude to Rev Dr Alphonse SJ, MA, Ph.D, Principal, St Xavier’s College, Palayamkottai who exudes cheer and warmth in all my interaction with him. It is heartwarming to think of and acknowledge the role played by Fr K Amal SJ, Rector, Loyola College, Chennai, Fr V Britto SJ, Rector, St Xavier’s College, Palayamkottai and my beloved Jesuit companions at the St Xavier’s community who stayed with me in the process of my studies with their energizing words.
The erudite staff who have set a culture of Research at the Department of Mathematics, St Xavier’s College, Palayamkottai owe my sincere appreciation and gratefulness for their unfailing support and encouragement.

I feel humbled to realize the benevolence of God blessing me with countless generous souls who stand by me in every phase of my growth.

S. Samuel Jeyaseelan
