ACKNOWLEDGEMENT

It is my first and foremost duty to express my sincere sense of gratitude to my research supervisor, Dr. S. K. GUPTA, Reader in Chemistry, B. B. College, Jhansi, who has all along been a source of inspiration to me, guiding and helping me in tackling problems as and when they cropped up, during my tenure as his research scholar for the last few years, at different stages and levels. I am also grateful to Dr. C. M. Gupta, Head of department of Chemistry of the institution for making useful suggestions from time to time in carrying out the work and compilation of this dissertation.

I am also thankful to Dr. U. P. Singh, Principal of the college for constant support and provision of research facilities. I shall remain obliged to all my teachers of the Department of Chemistry for making useful comments and tendering their practical advice as often as possible.

I sincerely acknowledge the constant support and blessings of my respected parents-in-law Smt. Chandrakanta and Shri Hari Ram Sehgal who have provided to me encouragement and support throughout the tenure of the investigations.

I am also very thankful to my parents Smt. Saroj and Shri R. K Vasudev for their emotional support during the period of this research. My younger brother, Rahul Vasudev and my younger sister, Prerna Vasudev, too chipped in with his assistance and cooperation, when it mattered most, at the time of typing of this thesis.

Last but not the least I express my indebtedness to my husband Shri Rajiv Sehgal whose sacrifices and fortitude were a source great of inspiration to me.

JHANSI
