

LIST OF PHOTOGRAPHS

<u>Figure</u>		<u>Page</u>
P1	V.S. of gill of control <i>H. fossilis</i> .	221
P2	V.S. of gill of control <i>H. fossilis</i> magnified.	221
P3	V.S. of gill of <i>H. fossilis</i> after 24 hrs. exposure to 1.0 mg/l cadmium sulphate	222
P4	V.S. of gill of <i>H. fossilis</i> after 10 days exposure to 2.0 mg/l cadmium sulphate.	222
P5	V.S. of gill of <i>H. fossilis</i> after 20 days exposure to 2.0 mg/l cadmium sulphate.	223
P6	V.S. of gill of control <i>C. mrigala</i> .	223
P7	V.S. of gill of <i>C. mrigala</i> after 48 hrs. exposure to 100 ug/l mercuric chloride	224
P8	V.S. of gill of <i>C. mrigala</i> after 96 hrs. exposure to 100 ug/l mercuric chloride.	224
P9	V.S. gill of <i>C. mrigala</i> after 10 days exposure to 200 ug/l mercuric chloride.	225
P10	V.S. of gill of <i>C. mrigala</i> after 10 days exposure to 500 ug/l mercuric chloride.	225
P11	V.S. of gill of <i>H. fossilis</i> after 24 hours exposure to 2.0 mg/l nickel sulphate.	226
P12	V.S. of gill of <i>H. fossilis</i> after 10 days exposure to 6.0 mg/l nickel sulphate.	226
P13.	V.S. of gill of <i>H. fossilis</i> after 20 days exposure to 6.0 mg/l nickel sulphate.	227
P14	V.S. of liver of control <i>H. fossilis</i> .	227
P15	V.S. of liver of <i>H. fossilis</i> after 5 days exposure to 2.0 mg/l cadmium sulphate.	228
P16	V.S. of liver of <i>H. fossilis</i> after 20 days exposure to 3.0 mg/l cadmium sulphate.	228
P17	V.S. of liver of <i>C. mrigala</i> after 20 days exposure to 50 ug/l mercuric chloride.	229
P18	V.S. of liver of <i>C. mrigala</i> after 5 days exposure to 200 ug/l mercuric chloride.	229
P.19	V.S. of liver of <i>C. mrigala</i> after 96 hrs. exposure to 600 ug/l mercuric chloride.	230

P20	V.S. of liver of <i>H. fossilis</i> after 20 days exposure to 1.0 mg/l nickel sulphate.	230
P21	V.S. of liver of <i>H. fossilis</i> after 10 days exposure to 4.0 mg/l nickel sulphate.	231
P22	V.S. of liver of <i>H. fossilis</i> after 20 days exposure to 6.0 mg/l nickel sulphate.	231
P23	V.S. of liver of <i>H. fossilis</i> after 10 days exposure to 8.0 mg/l nickel sulphate.	232
P24	V.S. of liver of <i>H. fossilis</i> after 10 days exposure to 10.0 mg/l nickel sulphate.	232
P25	T.S. of kidney of control <i>H. fossilis</i> .	233
P26	T.S. of kidney of <i>H. fossilis</i> after 96 hrs. exposure to 1.0 mg/l cadmium sulphate.	233
P27	T.S. of kidney of <i>H. fossilis</i> after 10 days exposure to 2.0 mg/l cadmium sulphate.	234
P28	T.S. of kidney of <i>H. fossilis</i> after 5 days exposure to 4.0 mg/l cadmium sulphate.	234
P29	T.S. of kidney of <i>C. mrigala</i> after 48 hrs exposure to 100 ug/l mercuric chloride.	235
P30	T.S. of kidney of <i>C. mrigala</i> after 96 hrs. exposure to 200 ug/l mercuric chloride.	235
P31	T.S. of kidney of <i>C. mrigala</i> after 10 days exposure to 400 ug/l mercuric chloride.	236
P32	T.S. of kidney of <i>H. fossilis</i> after 5 days exposure to 2.0 mg/l nickel sulphate.	236
P33	T.S. of kidney of <i>H. fossilis</i> after 10 days exposure to 4.0 mg/l nickel sulphate.	237
P34	T.S. of kidney of <i>H. fossilis</i> after 10 days exposure to 8.0 mg/l nickel sulphate	237
P35	T.S. of kidney of <i>H. fossilis</i> after 5 days exposure to 10.0 mg/l nickel sulphate.	238
