ACKNOWLEDGEMENT

It is always a happiest moment when a person realizes that who’s aspiration is going to be successful after 5-6 years of painstaking efforts that the person afford to achieve the target as an expected outcome. It was altogether a fantastic experience to me. It helped me to learn how to fix the objectives to initiate a process and accordingly plan to complete them with their premeditated priority; how one should interact with the associates to get them involved in the whole process; how to analyze mistakes so that in the next time the person can be done the same job in more precision; how patiently and carefully follow the mundane but essential steps to establish tenet; and most importantly how a process should be gradually unfurled to diverge the activities under its preview, and after performing the required tasks, finally to coverage them to achieve the desired goal.

I am really grateful and want to convey my heartiest gratitude to Dr. Abhijit Chanda, Director, School of Bio-Science and Engineering, Jadavpur University, my teacher and friend who educate me in all those aspects of Research. He is the person who introduced me with ceramic materials in particular Alumina a completely unknown material to me. His continuously incited me to learn more on the theoretical aspects of any topic before going to the real-life experimentation on the same. His continuous support helped me in publishing my work in appropriate journals. In spite of his busy and tight scheduled, he never hesitated to extend his hand to resolve the problems whatever arose during the entire process of Research work With his sheer astuteness he educated me to analyze a situation and to draw the right conclusion out of it. He is invariably an example of real-life character with invincible spirit for me.
Prof. Manoj Mitra, Department of Metallurgical Engineering, Jadavpur University and formerly Dean, Faculty of Engineering & Technology, Jadavpur University, was always a force of motivation to me and I was mesmerized by his simple but powerful advice, whenever I approached him for so. In spite of his extremely tight scheduled, he was always generous with his indispensable practical ideas asked by his students. I always feel a bit more confident whenever I interacted with him. He helped me to learn to judge any situation from a neutral position. His candid but useful ideas educated me a lot to establish my work in outer world through the publications. I would like to express my sincere gratitude to him for his continuous encouragement at different stages of this work.

I would like to thank Dr. Debabrata Nag, Associate Professor, Department of Mechanical Engineering, Jadavpur University, friendly senior for his valuable suggestions for data synthesis problem solving in many difficult situation.

I would like to acknowledge Dr. Rajdip Singha Roy, Mr. Biswanath Kundu, Dr.M.K.sinha,Mr. A.Dasgupta and Mr. S.Gangadharan, Scientist, Bio-ceramic and coating division of CGCRI, kolkata, for their all kind of helping hands. I like to thanks Mr.Tony Murmu , Mr. Jagabandhu Shit and Mr Sujit Nath who helped me to do analytical works.

I also would like to convey my thanks to Mr. Subhankar Bhowmick who helped me to know about the basic of Ansys.

I would like to thank all staff members and my friendly students of ‘School of Bio-Science and Engineering’, Jadavpur University for their constant support and unparallel help and assistance.

I would like to express my sincere gratitude to my Ex.HOD, Prof.T.K.Roy for his continuous encouragement to do the doctoral work. I am also thankful to my present HOD, Dr. Moloy K Banerjee, and other colleague for their extended support.
I am also grateful to our Principal, Dr. Aloke K Ghosh and Directors Dr. Mousumi Ghosh & Mr. Silajit Ghosh respectively for their extreme support to carry on the Ph.D work.

Finally, I want to express my heartiest respects to my beloved wife and sweet daughter Mrs. Mithu Dey Barai and Miss. Yooktashree Barai respectively for their sacrifice to complete my thesis. I am also respectful to my parents and other family members for their blind supports.
