Acknowledgements

All praises and thanks are due to Almighty Allah who enables me to complete my PhD thesis. On this moment of submission of my PhD thesis, I would like to thank all the people who have helped and inspired me during my doctoral study.

I would like to express my deep sense of gratitude to my mentor, Dr. Sunil Kumar Mukherjee for providing me an opportunity to work under him. I am indebted to his constant guidance, encouragement, enthusiasm in teaching and clarifying the subject contents in my PhD period. He is always enthusiastic and encouraging about science, his constructive comments, positive attitude greatly helped me during the course of investigation. His insights into the field of RNAi made me realize and understand the subject in a broader perspective. I also thank him for his caring and consideration.

I express my sincere gratitude to Dr. Nirupam Roy Choudhury for his valuable advice and constant guidance, support and encouragement in all the aspects of my PhD study, especially in the compilation of this thesis. His technical advice and suggestions were of great help in solving the problems. I am also thankful to Dr. Neeti S. Mishra for her valuable suggestions and supervision during the course of the study.

I am extremely grateful to our group leader Prof. S. K. Sopory. He has always provided a patient ear, and his encouragement and guidance have helped me a lot to progress in my PhD course. He helped me in applying for Pre-Doctoral Fellowship program of ICGEB and also provided me grants to participate in an international conference in UK. I also express my gratitude to sir for upholding the conducive, open and pleasant working environment in the PMB lab.

I am thankful to Prof. V. S. Chauhan, Director of ICGEB and Mrs. S. Narayanan, Chief Administration for providing all the necessary facilities due to which I could carry on my work without any hindrance.

I am indebted to Dr. Vijay Kumar and Dr. S. Swaminathan of ICGEB, New Delhi for their constructive suggestions and commandants during my PhD period. Being my Doctoral Committee members they critically evaluated my progress and gave me proper directions to design and carry out my research project. I am so much thankful to them.

Dr. N. Tuteja, Dr. M. K. Reddy, Dr. Suresh Nair and Dr. Snehl L. Singla-Pareek were most supportive and helpful providing the critical insights and technical details in various molecular biology techniques which have been really helpful to go about my studies with confidence. I am so much thankful to them. I am also indebted to Dr. Raj K. Bhatnagar and Dr. V. S. Reddy for their support and encouragement.
I am thankful to Dr. Chetan Chitnis for providing me the facility of fluorescence microscopy. The support provided by all the scientists of ICGEB is duly acknowledged.

Heartfelt thanks go to my best friend and colleague, Dr. Ananda for his tremendous help in various aspects of my research and also in my personal life and social life in every possible way. I am also extremely grateful to my very close friend and colleague, Dr. Subhasis from whom I have got hands on training of various molecular biology techniques. Warm thanks to Dr. Pradip for his suggestions which helped me in different aspects of my research. I am extremely grateful to my seniors, Dr. Sumona and Shubhra and Dr. Nurul who helped from the beginning to end of my PhD period. Thanks to Faisal for mental support and strength during this period. I would also like to thank to Dr. Ananda Sarkar, INPGR, New Delhi for his suggestion and encouragement.

I am delighted to thank my close friends and colleagues of our Gemini group members Dr. Kalyan, Vikash, Pranjal, Afsar, Gati, Geetika, Dr. Pankaj, Prema, Dr. Kosalai, Vipin, Sonam, Dr. Dharmendra and Deepti who have helped in learning different molecular biology techniques and helped in different ways in the lab. It is also a pleasing moment to acknowledge our other Gemini group members and my friends, Bhuban, Archana, Dr. Jyoti, Meetu, Poopa, Preeti, Ram, Sujit, Rashmi, Ravi, Sameena, Thanh, Tian, Dr. Shuseel, Dr. Samir, Vikash Somani, Dr. Dharmendra, Shubham and Urvasi for their pleasant company and for being ready to help at any kind of request.

I would like to remember all the members of PMB for their presence, help and support, without which this thesis is impossible. I like to thank Dr. Anil, Dr. Bhunesh, Dr. Shidarth Dr. Hung, Dr. Ramesh, Dr. Hattem, Dr. Shakhinul, Dr. Wahid, Khirod, Shweta, Sudhakar, Dr. Rekha, Ritesh, Manoj, Thilini, Vishal, Charanpreet, Krishna, Chandar, Dr. Tanushri, Dr. Anita, Mallikarjun, Somesh, Mannu and Dr. Maryam for their help and support.

Warm regards to Hira Singh, Surinder and Ramesh Singh for providing me all kinds of supports for maintaining the plant materials in the Green house. Thanks to Preeti, Chandan-ji, Kartik, and Paan Singh for support in the lab in arranging chemicals and reagents and managing the lab nicely.

I would like to thank all my batchmates for their help and for all those light and cheerful moments that I shared with them.

I am fortunate enough to have a wonderful group of friends from my home country, Bangladesh. I am grateful to Dr. Ananda, Faisal, Dr. Saif, Shimul and his wife Reshma, Kibria, Dr. Shakhinul and his family. We had spent many remarkable moments together and they always made me feel at home. I will never forget the taste of Dr. Saif’s (our respected Munshi bhai) prepared food.
I want to express my heartiest gratitude and acknowledgement to my beloved Abba (father) and Ma (mother). They always give me unconditional support and encourage me in every step in my life. I have reached this position today only because of them.

I cannot forget the contribution of my younger brother, Saidur Rahman and sister, Dr. Farida Parvin who have been a constant reservoir of cheers at all those time when I needed it the most. I am also thankful to my brothers and sisters, Sajed, Farah, Farju, Shabrin, Sakib, Ruju, Mahbub and also to other family members.

I am extremely grateful to my wife, Kaniz Fatima. She has been an inspiration to every day and every aspect of my life. Without her unconditional love and support this day could not have come.

I would like to mention the importance and influences of my beloved son, Taishfigur Rahman in my life. He is the constant sources of all my inspirations, encouragements and happiness.

I would like to mention the support of my all family members. I acknowledge the support and blessing of my grandfather and late grandmother. I would like to express my gratitude to my father-in-law, Prof. M Jafar Ullah and mother-in-law for their support and blessing. I am thankful to my Boro api, Choto api, Boro dula bhai, Choto dula bhai, Saleh uncle and Aunty for their encouragement and helps. There are also numerous friends and relatives whose name I might have missed; also have provided a patient ear, advice and encouragement during my doctoral studies.

I would like to remember all my colleagues and friends of SAV, Dhaka for their help and support.

Last but not the least, I would like to acknowledge ICGEB for providing me the Pre-doctoral fellowship and giving me an advanced intensive training on Molecular Biology and Genetic Engineering, which will be very much helpful for my future science career.

Jamil
