Introduction	i
Bibliography	xxi
I. On some properties of the Cantor set and the construction of a class of sets with Cantor set properties (Communicated) ..	1
II. On some countable subsets of Cantor's middle third set	15
(Published Bull. Cal. Math. Soc., 61, 61-63 (1969))	
III. On some properties of sets with positive measure	24
(Published Bull. Cal. Math. Soc., 60, 47-51 (1968))	
IV. On a certain property of the Cantor set under the Steinhaus transformation of permutation	32
(Published with Dr. N. C. Bose Majumder as co-author. Bull. Cal. Math. Soc., 62, 139-144 (1970))	
V. Cantor property of a class of sets ..	45
(Communicated)	
VI. On thin sets of straight lines and circles (Communicated)	57
VII. Cantor sets in the construction of space-filling curves (Communicated). ..	69
