ACKNOWLEDGEMENTS

I wish to express my sincere gratitude to Prof. B. N. Srivastava, D.Sc., F.N.I., F.P.S. (London) for his kind interest, active help and encouraging guidance during the progress of the work. I am thankful to Dr. M. A. Quader, for his ungrudging help in tackling many a problem encountered during different phases of the work, and to all my colleagues for their kind cooperation. I am also grateful to the authorities of the Indian Association for the Cultivation of Science for financial assistance and laboratory facilities provided to me. I am also grateful to Government of India and to C. S. I. R. (New Delhi) for partial support.
