Acknowledgements

I sincerely thank Dr. R. S. Gokhale for giving me an opportunity to carry out this project under his supervision. I consider myself very fortunate to work under his mentorship and thank him for the strong foundation he has provided for pursuing good science in future. I would also like to thank my doctoral committee members for their valuable inputs. Dr. Rajni Rani in particular for teaching me cell culture techniques and allowing me to work in her laboratory. Dr. Debasisa Mohanty, Dr. Vinay Nandicoori and Dr. Pushkar Sharma for all the valuable discussions and encouragement. I would also like to thank Dr. N. Kurur at IIT, Delhi for the constant support and advice he has been giving me for years.

My special thanks to Arush and Divya for proof reading the thesis and for understanding me and being there at all times. I would like to thank Arush, Divya, Alzu, Priyanka, Mauld, Vivek, and Parul for maintaining a scientific lab ambience, which was quite motivational. The rigorous lab meetings and the ensued discussions have proved to be very fruitful. I would like to thank Manoj at Clemson University for helping me keep up with recent literature. It was nice to have Sharmishta, and Smriti around. I would really miss the time we all spent together. I would like to thank Mauld for all the valuable inputs and advice.

It was nice to work with Pallavi, Krithika, Nutan, Alaknanda, Faiza, Archana, and Archanaji in the lab. My special thanks to Suresh ji, Anil ji, Sunder ji, Prasad ji and Kapoor ji for all the help over the entire course of my Ph.D. Things would have been really difficult without support from you people. I would like to thank Neetu and Shailendra for being there whenever I needed them. On the whole I would like to thank the lab members of NIL I, NIL II and BIC for helping me out at every stage and for being very supportive. I would like to thank Veena and Shani for all the help and support during the initial phase of my Ph.D. Shani you
should have stayed. I would also like to thank Pooja and Priti for acquainting me with the lab work and being patient during my learning period.

Last but not the least; I thank my family for all their love and support. You guys really have been my backbone and it would have been extremely difficult without your help.

Tarun Chopra
