

CONTENTS

CHAPTER - I

General Introduction

		<u>Page</u>
Section-I	Theory of origin of endgroups & incorporation in vinyl polymers	1
Section-II	A critique of the methods of endgroups analysis	4
Section-III	Development of dye techniques for the determination of functional groups in polymers	6
Section-IV	Characterisation of polymers endgroup by the application of dye techniques	
	(i) Dye Partition Technique	7
	(ii) Dye Interaction Technique	8
Section-V	Present state of knowledge on endgroups in vinyl polymers :	
	(i) Bulk polymerization and endgroups	9
	(ii) Aqueous polymerization and endgroups	11
	(iii) Chain Transfer and endgroups	13
	(iv) Retarders and initiators and endgroups	14
Section-VI	Main theme of the present thesis	21

CHAPTER-II

Experimental

Section-I	Materials	25
Section-II	(i) Preparation of polymers	28
	(ii) Purification of polymers	29
Section-III	Chemical transformation of endgroups (non-responsive to the dye tests) to suitable dye-responsive groups	30

(Contd....)

	<u>Page</u>
Section-IV	Determination of intrinsic viscosity and molecular weight of polymers 32
Section-V	Endgroup analysis by the application of dye techniques 33
Section-VI	Determination of endgroups 33

CHAPTER-III

Permanganate-E.D.T. A. and Permanganate-Oxalic Acid as Redox Initiation Systems of Vinyl Polymerization	39
---	----

CHAPTER-IV

Redox Initiating Systems containing H_2O_2 as an Oxidant	57
--	----

CHAPTER-V

Redox Initiated Vinyl Polymerization Using Thiourea as a Reductant	65
--	----

CHAPTER-VI

Termination Reaction in Vinyl Polymerization	87
--	----

CHAPTER-VII

Endgroup Profile of Fractionated Polymers	93
---	----

CHAPTER-VIII

Summary	102
-------------------	-----
