ACKNOWLEDGEMENTS

The author is deeply indebted to Professor A. Bose, D.Sc., F.N.I., for suggesting the problems for the thesis and for his inspiring guidance at every stage of the work and in preparing the thesis. The author is also thankful to Dr. Debjani Ghosh, Dr. S. Lahiry and Dr. A. K. Pal for their active co-operations. It is also a pleasure to thank Dr. R. Roy and Sri. A. Roy of Saha Institute of Nuclear Physics, Calcutta, and Dr. P. K. Ghosh of Fertilizer Corporation of India, Sindri for helping us to undertake some of the EPR measurements with their high resolution instruments, and to Prof. K. N. Raymond of University of California, Berkeley for the generous supply of copper (II) tren salt.

The author expresses her grateful thanks to the authorities of the Indian Association for the Cultivation of Science, Calcutta for the award of Research Fellowships and for laboratory and other facilities provided by them and to the Workshop employees of this Association for technical assistance.

Dipti Pal
