CONTENTS

1. INTRODUCTION 1

2. CHAPTER 1 Reflection, refraction and diffraction of pulses in Layered Media 37

3. CHAPTER 2 Surface displacement due to direct P and interface reflected PP' phases in the case of a compressional point source lying in the perfectly isotropic homogeneous layer overlying the solid half-space 60

4. CHAPTER 3 Compressional point-source in a liquid layer overlying the solid half-space 82

5. CHAPTER 4 Displacement due to P, SV and SH waves in the case of a single force lying in the solid layer overlying the solid half-space 102

6. CHAPTER 5 Displacement due to a single couple and double couple in a homogeneous isotropic solid layer overlying the solid half-space 125

7. CHAPTER 6 Displacement due to a single force and double couple in a homogeneous solid half-space underlying the liquid layer of finite thickness 149

8. Summary and Conclusion 158

9. Bibliography
