PREFACE

The present thesis embodies the results of kinetic and related investigations of polymerization of vinyl monomers viz. methylmethacrylate, styrene and vinyl acetate using benzoyl peroxide and azo-bis isobutyronitrile as thermal initiators and pyridine as the solvent. The work was carried out by the author in the laboratories of Plastics and Rubber Technology Division of the Department of Applied Chemistry, Calcutta University.

The author wishes to express his deep sense of gratitude and indebtedness to his teacher Dr. P. Ghosh, F.P.R.I., Reader, Department of Applied Chemistry, Calcutta University for his keen interest, valuable guidance and constant encouragement during the course of the present work.

Thanks are due to Dr. P.K. Sen Gupta, Lecturer, Department of Applied Chemistry, Calcutta University for his valuable suggestions in the initial stages of the work.

Thanks are also due to Head of the Department of Applied Chemistry, Calcutta University, for kindly permitting the author to carry out the present investigations in the Department, placing all laboratory and library facilities at his disposal.

Contd. ....
The author acknowledges the help and cooperation received from Dr. A.N. Banerjee, Mr. S.N. Maiti, Mr. N. Mukherjee, Mr. M.S. Banerjee, Miss R. Ghosh, Mr. R. Chakraborti, Mr. S. Modak and Mr. D. Bhattacharya of the Department of Applied Chemistry.

The author is also thankful to the Council of Scientific and Industrial Research, Government of India, for awarding a fellowship during the tenure of the work.

Plastics and Rubber Technology Division, Dept. of Applied Chemistry, Calcutta University, 92, Acharya Prafulla Chandra Road, Calcutta-7000 09.
