FOREWORD

It is a pleasure to convey my grateful thanks to Dr. A. Narayanaswami, Head, Division of Fundamental Biochemistry of the Indian Institute of Experimental Medicine for his wise and able guidance of the work presented in this thesis.

I am indebted to Prof. R.N. Chakravarti, Director of the institute and to the Council of Scientific and Industrial Research for providing me with laboratory facilities and for the award of a CSIR Research Fellowship that enabled me to carry out the work embodied in the thesis.

I extend my deep sense of gratitude to Dr. R.G. Mahajan, Mr. S. Mukerjee, Mr. P.C. Banerjee, Dr. S. Sen Gupta, Dr. R.K. Ghosh and Mr. B. Das Mahapatra of this Institute and to Dr. D. Sengupta and Dr. S. Dutta of the Department of Biochemistry and Physiology respectively, of the Calcutta University, for their constant encouragement, active co-operation and criticism.

My thanks are due also to Messrs. N.K. Mallick, H.N. Dutta and D. Banerjee of the Institute for their help in the preparation of the thesis.

Lastly, I express my sincere thanks to all my colleagues, friends and seniors for their valuable suggestions and inspirations during the period of this work.

Dated: 25th January, 1977
