ACKNOWLEDGEMENT

My respected teacher Dr. B.C. Pathak, Reader, Department of Applied Chemistry, was the inspiration and guide throughout the investigations of the present work. I express my deep respect and gratitude for him.

I am grateful to the Head of the Department of Applied Chemistry for giving me permission for working in the departmental laboratory.

I acknowledge my gratefulness to the Director of the Central Drug Research Institute, Lucknow and Messrs Bristol Laboratories, Syracuse, N.Y., U.S.A., for kindly undertaking the study of in vitro amebicidal and trichomonacidal activity of the compounds presented in this thesis.

My thanks are due to Dr. A.U. Day, Dr. S. Lahiri, Dr. D.C. Ghosh, Mr. S. Mukherjee, Mr. P. Ghosal, Mr. R. Mukherjee, Mr. P. Mukherjee, Mr. B. R. Sarker, Mr. M. Bose, Mr. S. Moitra, Mrs. J. Mitra and Mr. C. Panja for their occasional suggestions and helps during the work.

Lastly, my thanks are due to Mr. R. Bhattecharjee, who undertook the micro-analysis of the compounds described in this thesis.
