ACKNOWLEDGEMENT

First, let me bow before the Almighty God for leading me and giving me strength throughout the research work and making this dissertation a reality.

I owe a great deal to many people and institutions for the invaluable help they have provided me during the course of the research work. I would like to express my sincere gratitude to my Supervising teachers Prof. (Dr.) Kuruvilla Joseph, Department of Chemistry, Indian Institute of Space Science and Technology Thiruvananthapuram and Prof. (Dr.) Sabu Thomas, School of Chemical Sciences, Mahatma Gandhi University, Kottayam for their valuable guidance, sustained interest and motivation during the entire period of my doctoral programme.

I am highly indebted to the management of Amrita Vishwa Vidyapeetham, Coimbatore and specifically Br.Abhayamrita Chaitanya, Pro-Chancellor for allowing me to carry out this work. I acknowledge the support received from Prof. R. Subba Rao and Prof. S. S. Bhagawan of the Department of Chemical Engineering and Materials Science. I am thankful to faculty colleagues of the Department of Chemical Engineering and Materials Science for their encouragement. The help extended by M/s.Vijaikumar, Shyamalal, Ramamoorthy, Dayalan and Girish Kaimal for the fabrication of the experimental setup is appreciated. I am thankful to Mr.Illangovan and Mr.Radakrishnan of the Department of Mechanical Engineering for their cooperation.

The cooperation and support received from the management of S.B.College, Changanacherry is highly appreciated. I express my gratitude to Mr.Tomlal, Mr.Shaji Joseph, Mr.Gijo of the Department of Chemistry of
S.B. College, Changanacherry for the help rendered during the course of the work. I am also thankful to the Director, Faculty and Staff of the School of Chemical Sciences, Mahatma Gandhi University for their encouragement.

Thanks to M/s Futura Polyesters Chennai, M/s Pluss Polymers New Delhi for the free supply of the material. I am indebted to M/s Welset Extrusions Ltd., Mumbai for carrying out some of the experimental work. I am grateful to Sophisticated Test and Instrumentation Center, Kochi, Department of Materials Engg, IISc, Bangalore, Department of Polymer Engineering, UICT-Mumbai, Composites Technology Center, IIT-Chennai for rendering assistance in testing and characterization. The support and help of my students Archana, Dhivya, Abirami, Monikumar, Divya, Keerthi, Prabhu, Nithin and Sairam are acknowledged.

I thank Mr. Shibu and Mr. Unni, Minitek Computers for the documentation of this thesis.

Finally, I would like thank my parents, brother and all the members of my family for creating a congenial environment at home, their support and prayers without which this work would not have been completed. Special thanks to my beloved wife Dr.K.M.Mini for being with me throughout this assignment. My kids Gopikrishnan and Meenakshi deserve special mention for soothing my mind with their smiles during the rough times.

K. JAYANARAYANAN
