

CONTENTS

CHAPTER 1

INTRODUCTION AND OBJECTIVES

1.1	Introduction	1
1.2	Objectives of the present work	2
1.3	Organisation of the thesis	7
	References	9

CHAPTER 2

MOLECULAR IMPRINTED POLYMERS: A REVIEW

2.1	Introduction	13
2.2	Molecular imprinting strategies.....	17
2.3	Advantages of molecular imprinted polymers	21
2.4	Disadvantages of molecular imprinted polymers.....	21
2.5	Factors favoring the formation of stable and high affinity binding sites.....	72
2.6	Polymer formats, polymerization methods and morphology	22
2.7	Parameters affecting the characteristics of the imprinted polymers.....	26
	1 Flexibility/rigidity of the crosslinked polymer	27
	2 Functional and crosslinking monomers	28
	3 Template/Functional monomer ratio	32
	4 Porogen/rebinding solvent	33
	5 Polymerization temperature	35
2.8	Characterization methods	36
	1 ¹ H NMR	37
	2 UV-vis	37
	3 FT-IR	38
	4 Fluorescence.....	38
	5 ¹³ C CP-MAS- NMR	38
	6 Scanning electron microscopy.....	39
2.9	Swelling studies	39
2.10	Measurement of binding characteristics.....	39
2.11	Applications of molecular imprinted polymers	41
	1 Substance specific adsorber materials	41
	2 Sensors	43
	3 Catalysis - Enzyme mimics	43
	4 Template assisted synthesis	44
	5 Molecularly imprinted sorbent assay - antibody mimics.....	45
	6 Drug Analysis	46
	7 Separation of enantiomers	47
	References	51

CHAPTER 3
EXPERIMENTAL

3.1	General.....	67
3.1.A.	Source of chemicals	67
3.1.B.	1. Purification of chemicals	67
	2. Purification of solvents	68
3.1.C	Analysis and characterization	69
3.2	Synthesis of molecular imprinted and non-imprinted polymers	69
3.2. A	Molecular Imprinting of Boc-L-tryptophan.....	69
3.2.A.1.	<i>Synthesis of EGDMA- and DVB-crosslinked MIPs and NIPs with varying composition of Boc-L-Trp-OH and functional monomer.....</i>	69
3.2.A.2.	<i>Synthesis of Boc-L-Trp-OH imprinted and non-imprinted polymers with varying extents of EGDMA and DVB crosslinking</i>	72
	1. <i>Synthesis of Boc-L-Trp-OH imprinted and non-imprinted polymers with varying extents of EGDMA and DVB crosslinking having template to functional monomer ratio 1:4</i>	73
	2. <i>Synthesis of Boc-L-Trp-OH imprinted and non-imprinted polymers with varying extents of DVB crosslinking with 1:2 T/FM ratio</i>	74
3.2.B	<i>Molecular imprinting of Boc-L-phenylalanine</i>	74
3.2.B.1.	<i>Synthesis of EGDMA-, DVB- and NNMBA-crosslinked MIPs and NIPs with varying composition of Boc-L-Phe-OH and functional monomer</i>	74
3.2.B.2.	<i>Synthesis of Boc-L-Phe-OH imprinted and non-imprinted polymers with varying extents of EGDMA and DVB crosslinking</i>	77
	1. <i>Synthesis of Boc-L-Phe-OH imprinted and non-imprinted polymers with varying extents of EGDMA crosslinking having 1:4 template to functional monomer ratio.....</i>	77
	2. <i>Synthesis of Boc-L-Phe-OH imprinted and non-imprinted polymers with varying extents of DVB-crosslinking having 1:2 template to functional monomer ratio</i>	79
3.2.C	Cocktail polymerisation	79
3.2.C.1	<i>Synthesis of EGDMA-crosslinked Boc-L-Phe-OH imprinted and non-imprinted polymers with</i>	

	<i>varying composition of Boc-L-Phe-OH and functional monomers</i>	80
3.2.C.2.	<i>Synthesis of Boc-L-Phe-OH imprinted and non-imprinted polymers with varying extents of EGDMA crosslinking having template to functional monomer ratio 1:8:8</i>	80
3.2.D	<i>Molecular Imprinting of D-mandelic acid</i>	82
3.2.D.1.	<i>Synthesis of EGDMA- and DVB-crosslinked MIPs and NIPs with varying composition of D-mandelic acid and functional monomer</i>	82
3.2.D.2.	<i>Synthesis of D-mandelic acid imprinted and non-imprinted polymers with varying extents of EGDMA crosslinking</i>	84
3.3	Swelling studies	85
3.4	Binding of template: General procedure	85
3.4.A	Binding capacity	86
3.4.B	Parameters affecting specific binding	86
3.4.C	Selectivity studies.....	87

CHAPTER 4

RESULTS AND DISCUSSION

Design of Molecular Imprinted Polymers with Selectivity Towards Amino Acids

4.1.	<i>Molecular imprinting of Boc-L-tryptophan</i>	81
4.1. A.	<i>Synthesis of EGDMA- and DVB-crosslinked Boc-L-Trp-OH imprinted and non-imprinted polymers</i>	91
1.	<i>Synthesis of EGDMA- and DVB-crosslinked Boc-L-Trp-OH imprinted and non-imprinted polymers with varying composition of template and functional monomer</i>	92
2.	<i>Synthesis of Boc-L-Trp-OH imprinted and non-imprinted polymers with varying extents of EGDMA- and DVB-crosslinking</i>	95
4.1.B.	<i>Characterization of Boc-L-Trp-OH imprinted and non-imprinted polymers</i>	95
1	<i>Chemical characterization</i>	95
(i)	<i>FT-IR</i>	95
(ii)	<i>Fluorescence</i>	97
(iii)	<i>¹H NMR</i>	98
2	<i>Morphological characterization by Scanning Electron Microscopy</i>	100
4.1. C	Swelling studies.....	101
4.1. D	Boc-L-Trp-OH binding studies	103

1	<i>Specificity in Boc-L-Trp-OH binding by imprinted polymers</i>	103
2	<i>Factors affecting Boc-L-Trp-OH binding</i>	106
3	<i>Optimization of the conditions of Boc-L-Trp-OH binding</i>	109
4	<i>Cross reactivity studies</i>	118
5	<i>Enantioselectivity</i>	119
6	<i>Separation /selectivity factors of EGDMA- and DVB-crosslinked Boc-L-Trp-OH imprinted polymers.</i> ..	123
4.1.E	<i>DVB-crosslinked Boc-L-Trp-OH imprinted poly(4-vinylpyridine) with 1:2 T/FM ratio</i>	126
1	<i>Synthesis of Boc-L-Trp-OH imprinted and non-imprinted polymers with varying extents of DVB-crosslinking having 1:2 template to functional monomer composition</i>	126
4.1.F	<i>Boc-L-Trp-OH binding studies</i>	126
1.	<i>Optimization of the conditions of Boc-L-Trp-OH binding</i>	126
2.	<i>Enantioselectivity</i>	130
4.2.	<i>Molecular imprinting of Boc-L-phenylalanine</i>	133
4. 2. A	<i>Synthesis of EGDMA-, DVB-, and NNMBA-crosslinked Boc-L-Phe-OH imprinted and non-imprinted polymers</i>	133
1.	<i>Synthesis of EGDMA-, DVB-, and NNMBA-crosslinked Boc-L-Phe-OH imprinted and non-imprinted polymers with varying composition of template and functional monomer</i>	133
2.	<i>Synthesis of Boc-L-Phe-OH imprinted and non-imprinted poly(4-vinylpyridine) with varying extents of EGDMA and DVB crosslinking</i>	135
4.2.B.	<i>Characterization of Boc-L-Phe-OH imprinted and non-imprinted polymers</i>	135
1	<i>FT-IR</i>	135
2	<i>¹H NMR</i>	136
3	<i>Fluorescence</i>	138
4	<i>Scanning Electron Microscopy</i>	139
4.2.C.	<i>Swelling studies</i>	139
4.2.D.	<i>Boc-L-Phe-OH binding studies</i>	140
1	<i>Specificity in Boc-L-Phe-OH binding by imprinted polymers</i>	141
2	<i>Factors affecting binding</i>	142
3	<i>Optimisation of the conditions of Boc-L-Phe-OH binding</i>	145
4	<i>Cross reactivity studies</i>	151

5	<i>Enantioselectivity</i>	153
6	<i>Separation factor/selectivity factor of EGDMA- and DVB-(40-80%) crosslinked Boc-L-Phe-OH imprinted polymers</i>	156
4.2.E	Cocktail polymerization	160
1.	<i>Synthesis of Boc-L-Phe-OH imprinted EGDMA-crosslinked 4-VP-co-AAM polymer with varying composition of template and functional monomer</i>	160
2.	<i>Synthesis of Boc-L-Phe-OH imprinted EGDMA-crosslinked 4-VP-co-AAM polymer with varying crosslink density keeping the T/FM ratio 1:8:8</i>	161
4. 2. F	Swelling studies	161
4. 2.G	Boc-L-Phe-OH binding studies	161
1.	<i>Factors affecting binding</i>	161
2.	<i>Enantioselectivity</i>	167
4. 3.	<i>Molecular Imprinting of D-mandelic acid</i>	168
4. 3. A	<i>Synthesis of EGDMA- and DVB-crosslinked D-mandelic acid imprinted and non-imprinted polymers</i>	169
1.	<i>Synthesis of EGDMA- and DVB-crosslinked D-mandelic acid imprinted and non-imprinted polymers with varying composition of template and functional monomer</i>	170
2.	<i>Synthesis of D-mandelic acid imprinted and non-imprinted polymers with 40 - 80% EGDMA crosslinking</i>	170
4.3.B.	Characterization of D-mandelic acid (D-MDA) imprinted and non-imprinted polymers	171
1	<i>FT-IR</i>	171
2	<i>¹H NMR</i>	171
3	<i>Scanning Electron Microscopy</i>	173
4.3.C	Swelling studies.....	173
4.3.D	D-Mandelic acid binding studies	174
1	<i>Specificity in D-MDA binding by imprinted polymers</i> .	174
2	<i>Factors affecting binding</i>	176
3	<i>Optimisation of the conditions of D-MDA binding</i>	180
4	<i>Enantioselectivity of the D-MDA imprinted polymers</i> ..	184
5	<i>Separation /selectivity factors of EGDMA-crosslinked (40-80%)D-MDA imprinted polymers</i>	185
	References	188

CHAPTER 5

SUMMARY AND OUTLOOK	193
----------------------------------	-----
