

A C K N O W L E D G E M E N T S

The present study was carried out in the Department of Biochemistry and the Department of Physiology, University College of Medicine, Calcutta University.

The author is highly indebted to Dr. A. K. Maiti, M.Sc., M.B.B.S., D. Phil., Head of the Department of Biochemistry and formerly Head of the Department of Physiology, University College of Medicine for initiating research in this field and for taking sustained interest in encouraging and guiding the author at all stages of investigation, analysis of data and preparation of the thesis. She is taking this opportunity to express her sincere and deep gratitude to him.

To Professor S. R. Maitra, Head of the Department of Physiology, University College of Science, Calcutta University, she wishes to pay her special respect for his ready advice and encouragement with laboratory facilities whenever needed.

She is also indebted to Dr. B. Duttachowdhury, Lecturer, Department of Physiology, University College of Medicine for his valuable suggestions during the experiments and for checking the manuscript, and to Dr. A.K. Ghosh, Lecturer, Department of Biochemistry for helping her with necessary facilities during the work. Her thanks are also due to Miss D. Sarkar for kindly going through the manuscript. The author is also indebted to Prof. D.N. Ganguly and Mr. N. Dutta, Department of Zoology, Calcutta University for extending the necessary library facilities.

The photographic work included in this thesis and typing were done by Mr. Nemaï Bera of the Department of Physiology to whom she is also grateful.

The author is also taking this opportunity to thank all her colleagues and technical staff of the Department for their kind co-operation and help.

Finally she wishes to express her deep appreciation to the University College of Medicine, Calcutta University for providing her the Research Scholarship for carrying out this investigation.
