</table>
Table 4.10  Distribution of children with cerebral palsy into MACS levels based on the presence of associated impairments

Table 4.11  Mean value and standard deviation of scores of GMFM - 88 of children with cerebral palsy

Table 4.12  Mean values and standard deviations of GMFM -88 scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.13  Summary of ANOVA for scores of GMFM-88 and levels of GMFCS of children with cerebral palsy

Table 4.14  Summary of Bonferroni test for the scores of GMFM - 88 and levels of GMFCS of children with cerebral palsy

Table 4.15  Correlation between the scores of functional gross motor abilities as measured by GMFM-88 and levels of GMFCS of children with cerebral palsy

Table 4.16  Mean scores and standard deviation of GMFM - 88 scores of children with cerebral palsy with respect to difference in fine motor abilities as measured by MACS levels

Table 4.17  Summary of ANOVA for the GMFM – 88 scores of children with cerebral palsy with respect to difference in fine motor abilities as measured by MACS levels

Table 4.18  Summary of Bonferroni test for the GMFM - 88 scores of children with cerebral palsy with respect to difference in the fine motor abilities as measured by MACS levels

Table 4.19  Correlation between the gross motor abilities as measured by GMFM - 88 scores of children with cerebral palsy with respect to difference in fine motor abilities as measured by MACS levels
Table 4.20  Descriptive statistics of functional academic skills scores of children with cerebral palsy (N=100)  118

Table 4.21  Frequencies and percentages of children with cerebral palsy with respect to levels of functional academic skills  120

Table 4.22  Descriptive statistics of functional receptive and expressive language skills scores of children with cerebral palsy (N=100)  121

Table 4.23  Frequencies and percentages of children with cerebral palsy with respect to level of receptive and expressive language skills  122

Table 4.24  Descriptive statistics of functional reading and writing skills scores of children with cerebral palsy (N=100)  124

Table 4.25  Frequencies and percentages of children with cerebral palsy with respect to levels of functional reading and writing skills  127

Table 4.26  Descriptive statistics of functional number and time skills scores of children with cerebral palsy (N=100)  128

Table 4.27  Frequencies and percentages of children with cerebral palsy with respect to level of functional number and time skills  130

Table 4.28  Mean values of functional academic skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels  131

Table 4.29  Summary of ANOVA for the functional academic skills scores with respect to gross motor abilities as measured by GMFCS levels  133

Table 4.30  Summary of Bonferroni test for the pair wise comparison of functional academic skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels  134
Table 4.31  Correlation between functional academic skills scores and the gross motor abilities of children with cerebral palsy as measured by the levels of GMFCS

Table 4.32  Mean values of functional receptive language skills Scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.33  Summary of ANOVA for the functional receptive language skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.34  Summary of Bonferroni test for the pair wise comparison of functional receptive language skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.35  Mean values of functional expressive language skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.36  Summary of ANOVA for the functional expressive language skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.37  Summary of Bonferroni test for the pair wise comparison of functional expressive language skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.38  Mean functional reading skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.39  Summary of ANOVA for the functional reading skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels
Table 4.40  Summary of Bonferroni test for the functional reading skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.41  Mean functional writing skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.42  Summary of ANOVA for the functional writing skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.43  Summary of Bonferroni test for the functional writing skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.44  Mean functional number skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.45  Summary of ANOVA for the functional number skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.46  Summary of Bonferroni test for the functional number skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.47  Mean functional time skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.48  Summary of ANOVA for the functional time skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels

Table 4.49  Summary of Bonferroni test for the functional time skills scores of children with cerebral palsy with respect to gross motor abilities as measured by GMFCS levels
Table 4.50  Mean functional academic skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels  154
Table 4.51  Summary of ANOVA for the functional academic skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels  156
Table 4.52  Summary of Bonferroni test for the functional academic skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels  157
Table 4.53  Correlation between the functional academic skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels  158
Table 4.54  Mean functional receptive language skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels  159
Table 4.55  Summary of ANOVA for the functional receptive language skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels  160
Table 4.56  Summary of Bonferroni test for functional receptive language skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels  161
Table 4.57  Mean functional expressive language skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels  162
Table 4.58  Summary of ANOVA for the functional expressive language skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels  163
Table 4.59 Summary of Bonferroni test for the functional expressive language skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels

Table 4.60 Mean functional reading skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels

Table 4.61 Summary of ANOVA for the functional reading skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels

Table 4.62 Summary of Bonferroni test for the functional reading skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels

Table 4.63 Mean functional writing skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels

Table 4.64 Summary of ANOVA for the functional writing skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels

Table 4.65 Summary of Bonferroni test for the functional writing skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels

Table 4.66 Mean functional number skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels

Table 4.67 Summary of ANOVA for the functional number skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels
Table 4.68 Summary of Bonferroni test for the functional number skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels 173

Table 4.69 Mean functional time skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels 174

Table 4.70 Summary of ANOVA for the functional time skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels 175

Table 4.71 Summary of Bonferroni test for the functional time skills scores of children with cerebral palsy with respect to fine motor abilities as measured by MACS levels 176

Table 4.72 Means, standard deviations and t-value of functional academic skills scores of children with cerebral palsy with respect to gender 178

Table 4.73 Means and standard deviations of functional academic skills scores of children with cerebral palsy with respect to motor types 179

Table 4.74 Means, standard deviations and t-value of functional academic skills scores of children with cerebral palsy with respect to motor types (spastic and choreoathetoid) 180

Table 4.75 Means and standard deviations of functional academic skills scores of children with cerebral palsy with respect to topographical distribution 181

Table 4.76 Summary of ANOVA for the functional academic skills scores of children with cerebral palsy with respect to topographical distribution 182
Table 4.77 Summary of Bonferroni test for the functional academic skills scores of children with cerebral palsy with respect to different topographical distribution 183

Table 4.78 Means and standard deviations of functional Academic skills scores of children with cerebral palsy with respect to their level of intelligence 184

Table 4.79 Summary of ANOVA for functional academic skills scores of children with cerebral palsy with respect to their level of intelligence 185

Table 4.80 Summary of Bonferroni test for the functional academic skills scores of children with cerebral palsy with respect to their level of intelligence 186

Table 4.81 Means and standard deviations of functional academic skills scores of children with cerebral palsy with respect to their birth order 187

Table 4.82 Summary of ANOVA for the functional academic skills scores of children with cerebral palsy with respect to birth order 187

Table 4.83 Means and standard deviations of functional academic skills scores of children with cerebral palsy with respect to their religion 188

Table 4.84 Summary of ANOVA for the functional academic skills scores of children with cerebral palsy with respect to their religion 189

Table 4.85 Means and standard deviations of functional academic skills scores of children with cerebral palsy with respect to monthly income of the family 190

Table 4.86 Summary of ANOVA for the functional academic skills scores of children with cerebral palsy with respect to the monthly income of family 191
Table 4.87  Summary of Bonferroni test for pair wise comparison of means of functional academic skills scores of children with cerebral palsy with respect to monthly income of family  

Table 4.88  Means, standard deviations and t-value of functional academic skills scores of children with cerebral palsy with respect to place of residence  

Table 4.89  Means, standard deviations and t-value of the functional academic skills scores of children with cerebral palsy with respect to years of schooling  

Table 4.90  Means, standard deviations and t-value of functional academic skills scores of children with cerebral palsy with respect to type of family  

Table 4.91  Means, standard deviations and t-value of functional academic skills scores of children with cerebral palsy with respect to age of parents (father and mother)  

Table 4.92  Means and standard deviations of functional academic skills scores of children with cerebral palsy with respect to occupation of father  

Table 4.93  Summary of ANOVA for the functional academic skills scores of children with cerebral palsy with respect to occupation of father  

Table 4.94  Summary of Bonferroni test for pair wise comparison of means of functional academic skills scores of children with cerebral palsy with respect to occupation of father  

Table 4.95  Means and standard deviations of functional academic skills scores of children with cerebral palsy with respect to occupation of mother  

Table 4.96  Summary of ANOVA for the functional academic skills scores of children with cerebral palsy with respect to occupation of mother
Table 4.97  Means and standard deviations of functional academic skills scores of children with cerebral palsy with respect to education of parents (father and mother)  

Table 4.98  Summaries of ANOVA for the functional academic skills scores of children with cerebral palsy with respect to education of parents (father and mother)  

Table 4.99  Means, standard deviations and t-value of functional academic skills scores of children with cerebral palsy with respect to presence or absence of visual impairment  

Table 4.100  Means, standard deviations and t-value of functional academic skills scores for children with cerebral palsy with respect to presence or absence of speech impairment  

Table 4.101  Means, standard deviations and t-value of functional academic skills scores of children with cerebral palsy with respect to presence or absence of hearing impairment  

Table 4.102  Means, standard deviations and t-value of functional academic skills scores of children with cerebral palsy with respect to presence or absence of behavioural problems  

Table 4.103  Means, standard deviations, and t-value of functional academic skills scores of children with cerebral palsy with respect to their age  

Table 4.104  Means, standard deviations, and t-value of functional academic skills scores of children with cerebral palsy with respect to presence or absence of epileptic attack
Table 4.105  Summary of step wise multiple regression analysis of functional academic skills scores of children with cerebral palsy with respect to independent variables (age, topographical type, presence of mental retardation, speech impairment, hearing impairment, visual impairment, epileptic attacks, behavioural problems) on dependent variable (functional academic skills)
