CONTENTS

1. Introduction ........................................ 1 - 26
2. Aims and Objectives .................................. 27 - 29
3. Chapter I:
   Section A: Levels of Different Phosphate
     Metabolizing Enzymes in the Seeds
     of V. sinensis during Germination ............... 30 - 59
   Section B: Multiple forms of Acid Phosphatase
     in the Germinating seeds of V. sinensis ....... 60 - 76
4. Chapter II:
   Section A: Separation and partial purification
     of acid Phosphatases from the
     Cotyledons of 48-h Germinating seeds
     of V. sinensis .................................... 77 - 96
   Section B: Characterization of four partially
     purified acid Phosphatases ....................... 97 - 112
   Section C: Comparison of Phosphatase and Pyro-
     phosphatase activities present in
     the purified enzyme fraction AP-I .............. 113 - 130
5. Chapter III: Kinetic Studies on four Isolated
   Acid Phosphatases .................................. 131 - 148
6. General Discussion .................................. 149 - 159
7. Summary ............................................. 160 - 162
8. References .......................................... 163 - 177
