The thesis entitled "Ascorbic acid and dehydroascorbic acid metabolism in diseases and stressful conditions" is submitted for the Degree of Doctor of Philosophy (Science) of the University of Calcutta.

My sincerest thanks are due to my teacher Dr. I.B. Chatterjee, Reader, Department of Biochemistry, Calcutta University, for his valuable suggestions and guidance during the course of this investigation. My thanks are also due to Dr. J.J. Ghosh, Head of the Department of Biochemistry.

My grateful thanks are due to Dr. S.S. Bhattacharya, Principal, R.G.Kar Medical College and Hospital for permitting me to collect such samples of human blood as were required for the study from different departments of the hospital and for the inspiration I derived from him during the course of my study. My grateful thanks are also due to all medical officers, nursing staff of the R.G.Kar Medical College and Hospital for their sincerest help and cooperation without which this work would not have been possible. My grateful thanks are also due to Dr. S.K. Deb, former Surgeon Superintendent, S.S.K.M. Hospital, Calcutta. Dr. P.C. Mitra, former Director, Central Blood Bank, Calcutta Medical College and Hospital and Dr. R.N. Roy, Head of the Department of Medicine, Calcutta Medical College and Hospital for
permitting me to collect such human blood samples as was required for my study from the respective departments or hospitals.

My thanks are due to my colleagues Mr. S. Basu and Mr. S. Som for their whole hearted help and cooperation in this work.

My thanks are also due to the following individuals who helped in various ways in this investigation: Mr. C. C. Chakraborty, Mr. S. Deb, Mr. S. Sarkar, Mr. J. Chatterjee, Mr. T. Das and Mr. T. Nanda and other friends and colleagues.
