ACKNOWLEDGEMENT

The author takes this opportunity to offer his grateful thanks to Dr. Amarendra Patra, Ph.D., P.R.S., F.I.C., Lecturer, Department of Chemistry, University of Calcutta for his helpful discussions and valuable guidance throughout the course of his investigation and for providing laboratory facilities.

The author is indebted to Professor (Mrs.) Asima Chatterjee, D.Sc., F.N.A.*, M.P., Kheira Professor of Chemistry and Dr. Alok Kumar Mitra, Ph.D., Lecturer in Chemistry, University of Calcutta for their keen interest and co-operation during the progress of the investigation.

Sincere co-operation of Mr. C. Dasgupta and Mr. M. Debnath, employees of this department, in course of the preparation of the thesis is thankfully acknowledged. Kind co-operation of my friends and colleagues specially Dr. A. Ghosh, Dr. A. K. Mukhopadhyay, Dr. S. Chakrabarty, Mr. S. Misra, Mrs. G. Ghosh and Mr. S. Choudhury of this department is also thankfully acknowledged.
Sincere thanks are accorded to Mr. A. Acharyya, Mr. P. Ghosh, Mr. J. Ghosh (Department of Chemistry, Calcutta University), Professor U. R. Ghatak (I. A. C. S., Jadavpur, Calcutta), Professor A. K. Barua (Bose Institute, Calcutta), and Mr. B. P. P. Srivastava (CDRI, Lucknow) for their kind cooperation in providing various spectral data.

Finally, the author expresses his profound regards to his parents and other family members and Dr. R. S. Banerjee without whose constant help and good wishes this work would not have been possible.
