

CONTENTS

CHAPTER- I

General introduction

VENOMOUS SNAKES	1
SNAKE VENOM	2
OPHITOXAEemia	4
SNAKE ENVENOMATION	4
SYSTEMIC MANIFESTATIONS	4
Neurotoxicity	5
Myotoxicity	6
Cardiotoxicity	7
Cytotoxicity	7
Hemolytic activity	8
Coagulant activity (pro/anticoagulant)	8
Platelet aggregation (activation/inhibition)	9
Hypotensive activity	10
Convulsant activity	10
LOCAL MANIFESTATIONS	11
Edema forming activity	11
Hemorrhagic activity	12
Dermonecrosis/ myonecrosis	14
POSSIBLE AGENTS OF LOCAL TOXICITY	14
EXTRACELLULAR MATRIX (ECM)	15
EXTRACELLULAR MATRIX DEGRADING ENZYMES	16
Hyaluronidases	16
Structure and mechanism of action	18
Snake venom metalloproteinases (SVMPs)	22
Domains in snake venom metalloproteases (SVMPs)	23
Protease domain	23
Disintegrin / disintegrin - like domains	24

Spacer region	25
Cysteine – rich domain	25
SNAKE BITE TREATMENT	26
AIM AND SCOPE OF THE PRESENT INVESTIGATION	37

CHAPTER - II

Screening of Indian medicinal plants for anti-venom property against Indian *Daboia/*

***Vipera russellii* and *Echis carinatus* venoms**

INTRODUCTION	39
MATERIALS AND METHODS	40
Preparation of the extracts	41
Protein estimation	42
Hemorrhagic activity	42
Edema forming activity	43
Caseinolytic activity	43
Hyaluronidase activity	44
Myotoxicity	45
Histopathological studies	46
Coagulant activity (Recalcification time)	46
Fibrinogenolytic activity	46
Statistical analysis	47
RESULTS	47
DISCUSSION	50

CHAPTER-III

Purification and characterization of hyaluronidase isoforms from Indian *Daboia/ Vipera russellii* venom and inhibition by gallic acid

INTRODUCTION	71
MATERIALS AND METHODS	73
Sephadex G-75 column chromatography	74

CM-Sephadex-C-25 column chromatography	74
Protein estimation	74
Assay of hyaluronidase activity and inhibition by GA	75
Sodium dodecyl sulphate polyacrylamide gel electrophoresis (SDS-PAGE)	75
pH and temperature kinetics and effect of NaCl on enzyme activity	76
Reversed phase –HPLC (RP-HPLC)	76
Mass spectrometry	76
Substrate specificity	77
Spreading property of hyaluronidase	77
Intrinsic fluorescence spectral studies	78
Circular Dichroism spectral studies	78
Statistical analysis	79
RESULTS	79
Purification of hyaluronidase isoforms	79
Properties of DRHyal-I	79
Properties of DRHyal-II	80
DISCUSSION	82

CHAPTER-IV

Gallic acid: a potent inhibitor of Indian *Daboia / Vipera russellii* venom and its purified hemorrhagic complex induced local toxicity

INTRODUCTION	108
MATERIALS AND METHODS	109
Purification of Hemorrhagic complex	110
Protein estimation	110
Caseinolytic activity	110
Indirect hemolytic activity	110
Edema forming activity	111
Hemorrhagic activity	111
Myotoxicity	111
Histopathological studies	112

Activity on extracellular matrix proteins	112
Fluorescence emission spectra of HC with GA	112
Circular Dichroism study of HC with GA	112
UV-VIS spectral study	112
Blood Ca ⁺² chelation	113
Neutralization of lethal toxicity of <i>DR</i> venom	113
Statistical analysis	113
RESULTS	114
DISCUSSION	118
SUMMARY AND CONCLUSION	144
REFERENCES	146
