

## LIST OF FIGURES

### CHAPTER-1

1.1	Overlapping of simulated 3D structure of (A) mammalian hyaluronidases and (B) venom hyaluronidases over the crystal structure of <i>Apis mellifera</i> hyaluronidase	34
1.2	Proposed catalytic mechanism of hyaluronan hydrolysis by snake venom hyaluronidase	35
1.3	Biological activities of selected SVMPs	36
1.4	Schematic structures of snake venom metalloproteinases	36

### CHAPTER-II

2.1	Inhibition of caseinolytic activity	59
2.2	Inhibition of proteolytic activity in casein zymogram	60
2.3 a	Inhibition of hyaluronidase activity of <i>DR</i> venom	61
2.3b	Inhibition of hyaluronidase activity of <i>EC</i> venom	62
2.4	Inhibition of hyaluronidase activity in zymogram	63
2.5	Inhibition of hemorrhagic activity	64
2.6	Inhibition of edema forming activity	65
2.7a	Inhibition of skeletal muscle tissue necrosis	66
2.7b	Inhibition of serum CK and LDH activities	67
2.8	Inhibition of pro-coagulant activity of <i>DR</i> venom	68
2.9	Inhibition of pro-coagulant activity of <i>EC</i> venom	69
2.10	Inhibition of fibrinogen degradation	70

### CHAPTER-III

3.1a	Elution profile from Sephadex G-75 column chromatography	90
3.1b	Elution profile from CM-Sephadex C-25 column chromatography	91
3.2a	SDS-PAGE pattern of purified hyaluronidase DRHyal-I	92
3.2b	Pattern of enzyme activity (zymogram assay)	92
3.3	Effect of pH (a), temperature (b) and NaCl (c) profiles of DRHyal-I	93
3.4a	SDS-PAGE pattern of purified hyaluronidase DRHyal-II	94

3.4b	Pattern of enzyme activity (zymogram assay) DRHyal-II	94
3.5	RP-HPLC profile of DRHyal-II	95
3.6	MALDI-TOF Mass spectrometry of DRHyal-II	96
3.7	Effect of pH (a), temperature (b) and NaCl (c) profiles of DRHyal-II	97
3.8	Dose dependence of DRHyal-II on the myotoxicity of VRV-PL-VIII myotoxin	98
3.9	Hemorrhagic activity of HC in the presence of DRHyal-II	99
3.10a	RP-HPLC profile of gallic acid (GA)	100
3.10b	Structure of gallic acid (GA)	100
3.11a	Inhibition of hyaluronidase activity of DRHyal-II by GA	101
3.11b	Inhibition of hyaluronidase activity of <i>DR</i> venom by GA	102
3.12	Line Weaver- Burk plot showing the uncompetitive nature of inhibition of DRHyal-II by GA	103
3.13	Fluorescence emission spectra of DRHyal-II in presence of GA	104
3.14	Far UV Circular Dichroism spectra of DRHyal-II	105
3.15	Inhibition of spreading property of DRHyal-II by GA	106
3.16	Inhibition of spreading activity of DRHyal-II by GA (hemorrhagic activity)	107

#### **CHAPTER-IV**

4.1	Inhibition of caseinolytic activity of HC and <i>DR</i> venom by GA	127
4.2A	Inhibition of edema forming activity of HC by GA	128
4.2B	Inhibition of edema forming activity of <i>DR</i> venom by GA	129
4.3A	Pre-incubation experiment: Inhibition of hemorrhagic activity of HC and <i>DR</i> venom by GA	130
4.3B	Inhibition of hemorrhagic activity: Independent injection experiment	131
4.4A	Light micrograph of transverse section of mice skin sections and blood vessels. A: HC pre-incubated with GA	132
4.4B	Light micrograph of transverse section of mice skin sections and blood vessels. B: <i>DR</i> venom pre-incubated with GA	133
4.4C	Light micrograph of transverse section of mice skin sections and blood vessels. C: Independent injection of HC and GA	134
4.4D	Light micrograph of transverse section of mice skin sections and blood	

vessels. D: Independent injection of <i>DR</i> venom and GA	135
4.5A Light micrograph of longitudinal section of mice skeletal muscle sections and respective serum CK and LDH activities. HC pre-incubated with GA	136
4.5B Light micrograph of longitudinal section of mice skeletal muscle sections and respective serum CK and LDH activities. <i>DR</i> venom pre-incubated with GA	137
4.5C Light micrograph of longitudinal section of mice skeletal muscle sections and respective serum CK and LDH activities. HC and GA independent injection	138
4.5D Light micrograph of longitudinal section of mice skeletal muscle sections and respective serum CK and LDH activities. <i>DR</i> venom and GA independent injection	139
4.6 Action on extracellular matrix proteins and analysis by SDS-PAGE	140
4.7 Fluorescence emission spectra of HC in presence of GA	141
4.8 Far UV Circular Dichroism spectra of HC. Spectra in presence and absence of GA were recorded	142
4.9 UV-VIS spectra of GA in presence of ZnCl <sub>2</sub>	143
