Acknowledgements

This is an initial page of my thesis, but surely one of the important part as now I have to acknowledge and admire many people and well wishers for their support, help and encouragement during my PhD stint at J.N.U. First and foremost, I would like to thank Prof. Karmeshu my thesis supervisor, and for his kind guidance, morale boosting support and dedicated interest in my work. It is a great feeling and privilege to work with him closely and it will cherish in my memory for ever. He is my mentor and whose help I gained valuable insight into the complex world of mathematical modelling. Despite his busy academic and administrative responsibilities he constantly monitored progress of my work and guided me in the right direction whenever necessary. He even came on weekends and generally stayed late hours in the School due to his interest and a commitment towards the work. This enabled me to speed my work and broadens my thought process, and motivated to explore other areas also.

I am highly indebted to Prof. H.M. Gupta, IIT, Delhi, for his specific suggestion about some unexplored areas in wireless networks. This led me to identify and formulate my research problem in a precise manner. My sincere thanks to Prof. S.K. Rangarajan, IISc, Bangalore, for improving certain technical aspects in my study. I did receive input from unexpected quarters in the form of Dr. D.L. Fitzgerald, Met,Eireann Glasnevin, Ireland for helping to solve complex integrals. I am grateful to Prof. N.R. Pal, ISI, Calcutta for his effort in providing real data set related to bio-medical imaging and Dr.Renota Smolikova, Robarts Imaging Research Laboratories, Canada for providing them. I like to acknowledge the useful inputs from Prof.M.H.Mahaskar(California State University).

My sincere thanks and gratitude to Mr. Krishmanachari for his inputs, suggestions and help throughout my PhD period. Special thanks to Mr. D. Goswami for clearing my doubts and V. Mandal for his help in getting very important documents. I like to thank my lab mates Mr. Narendra, Mr.Kiran and Mr. Kunwar for giving good company, support and help.
I take the opportunity to thank my well wishers Mr. Somitra, Mr. Praveen, Mr. Pankaj, Mr. Rishipal and A.P. Ruhil. I am grateful to my colleagues Dr. S.P. Purohit, Mr. Pankaj Sanwal and others at my Institute. Special mention for Dr. Jaiprakash, for his kind help in my academic career. I hereby acknowledge the kind help extended by the Hon’ble Minister, Shri. H.S. Bisht, which resulted in completion of my PhD work within the stipulated period. I acknowledge the role of my wife Pooja for her moral support and son Vishwas for adjusting himself to his routines without troubling me during this period. I am grateful to my parents, inlaws, family members and relatives for their good wishes. I am sure that I might have left few names whom I should have acknowledged, and I ask their forbearance and express my appreciation.

-Rajeev
