ACKNOWLEDGEMENTS

It is my sacred duty to express my heart felt gratitude to Dr. (Mrs.) F.K. Bhattacharyya who initiated me into the world of scientific research. Not only was she my supervisor for this thesis but also "friend, philosopher and guide". It is she who channeled an uninitiated youth into the metaphysics of scientific discipline. This work owes much to her and I remember her encouraging advice from the very early stage of this work and suggestions during the course of this work.

I thankfully acknowledge the help received from Dr. P. Gupta and all staff, S.T.D. Department of Nilratan Sircar Medical College and Hospital, Calcutta for the facilities offered in collecting patients' blood and culture.

Dr. A. Narayanaswami and Dr. K.A.I. Siddiqui deserve special thanks and gratitude for helpful advice.

I will fail in my duty, if I do not acknowledge the cooperation extended to me by my all colleagues in the Department of Bacterial Immunology and Media Section, especially Messrs B.M. Chanda, R.N. Mullick, P. Majumdar, Mrs. B. Lala, B. Sanyamat and Mrs. L. Chakrabarty. I appreciate their friendly sentiments and readiness to help whenever I required.
I acknowledge the help of Mr. S.N. Das and Mr. S. Chowdhury for the preparation of the manuscript and Mr. D.D. Banerjee for the photographic works in this thesis.

I am grateful and indebted to Prof. B.K. Bachhawat, F.N.A., The Director of our Institute, who kindly granted me the DST fellowship from his project for a short period. I am also grateful to him for his continuous encouragement and helpful advice.

I offer my sincere thanks to the Director General, Indian Council of Medical Research and R. D. Birla Smarak KOSH for awarding Research Fellowship and financial assistance which enable me to carry out the work.

Md. K. U. Saikh
