

FOREWORD

The present thesis entitled "The use of chromosome banding techniques in determination of chromosomal nature" is submitted for the degree of Doctor of Philosophy (Science) of the University of Calcutta. The aim of this thesis is to determine the nature of the chromosomes of mouse Sarcoma-180 cell-line with the help of different banding techniques.

It is my pleasant duty to express my deep sense of gratitude to my esteemed teacher and guide Dr. S. Ghosh, Reader in Botany, University of Calcutta for his kind guidance and valuable suggestions in course of this work. His amiable nature and forbearance towards his scholar during my course of work will be respectfully remembered all through my life.

I may convey my heartfelt thanks to Dr. K. Chaudhuri of Chittaranjan National Cancer Research Centre, Calcutta for providing me with mouse Sarcoma-180 cell line.

Thanks are also due to Prof. A.K.Sharma, Rashbehari Ghosh Professor of Botany, University of Calcutta and Prof. A. Sharma, Head, Department of Botany, University of Calcutta, for their continuous inspiration and helpful advice.

Lastly, the kind co-operation, assistance and forbearance of all my colleagues of the Department are thankfully taken in mind.

•

I also express my gratitude for the Financial Assistance
given by U. G .C. and C.S.I.R.

ALPANA CHAUDHURI
