

CONTENTS

1.	<u>INTRODUCTION</u>		
1.1	The Nucleus	...	2
1.2	Nuclear Potential : The Optical Model	...	4
1.3	Nuclear Reactions and Spectroscopy	...	6
1.4	Nuclear Analog States	...	9
1.5	Advantages of (p,n) Reactions at sub-Coulomb Energies	...	11
1.6	Scope of the Present Work	...	13
2.	<u>EXPERIMENTAL DETAILS AND RESULTS</u>		
2.1	Accelerator and Beam Transport System	...	18
2.2	Targets	...	20
2.3	Detector and Electronics	...	22
2.4	Accelerator Calibration	...	25
2.5	Measurement of Absolute (p,n) Cross Section	...	27
2.5.1	Measurement of Relative Neutron Yield	...	27
2.5.2	Estimation of Absolute Cross Section...		28
2.6	Experimental Results	...	29
2.6.1	Resonances in $^{55}\text{Mn}(p,n)^{55}\text{Fe}$ Reaction	...	29
2.6.2	Resonances in $^{80}\text{Se}(p,n)^{80}\text{Br}$ Reaction	...	33
2.6.3	Smooth Excitation Functions	...	33
3.	<u>ISOBARIC ANALOG RESONANCE SPECTROSCOPY</u>		
3.1	Isospin Quantum Number	...	37
3.2	Formation of IARs in Proton Induced Reactions	...	38
3.3	Coulomb Displacement Energy	...	42
3.4	Extraction of Neutron Spectroscopic Factor	...	46
3.4.1	Shape Analysis of the Resonance	...	46
3.4.2	Spectroscopic Factor	...	52
3.5	Results and Discussions	...	54
3.5.1	IARs in $^{55}\text{Mn}(p,n)^{55}\text{Fe}$ Reaction	...	54
3.5.2	IARs in $^{80}\text{Se}(p,n)^{80}\text{Br}$ Reaction	...	58

4.	<u>A SYSTEMATIC INVESTIGATION OF PROTON OPTICAL MODEL POTENTIAL AT SUB-COULOMB ENERGIES</u>	...	
4.1	Phenomenological Optical Model Potential	...	61
4.1.1	Components of the Potential	...	61
4.1.2	Energy Dependence	...	65
4.1.3	Coulomb Correction	...	67
4.1.4	Isospin Dependence	...	70
4.2	Motivation for a Systematic Investigation at Low Energies	...	71
4.2.1	Historical Background of sub-Coulomb OMP...		71
4.2.2	Energy Dependence of the Real Potential	...	73
4.2.3	Mass Dependence of the Imaginary Potential	...	77
4.2.4	Statement of the Problem	...	79
4.3	Analysis	...	80
4.3.1	General Background	...	80
4.3.2	Data Selection	...	81
4.3.3	Data Reduction : Average Strength Function	...	85
4.3.4	Fixed and Variable Parameters	...	88
4.3.5	Least Squares OMP Analysis	...	91
4.4	Results and Discussions	...	101
4.4.1	Systematics of the Real Potential	...	101
4.4.2	Systematics of the Imaginary Potential	...	106
4.4.3	Global Potential at sub-Coulomb Energies...		115
4.4.4	Collective and Shell Effects	...	116
4.5	Predictions of the Global Potential	...	118
4.5.1	Elastic Scattering	...	119
4.5.2	Reaction Cross Sections of Heavy Nuclei	...	122
4.5.3	p-wave Neutron Strength Functions	...	123
5.	<u>SUMMARY AND CONCLUSIONS</u>	...	126
	<u>APPENDIX</u> : Survey of the Parameter Space and the Determination of Errors in Least Squares Searches	...	134
	<u>REFERENCES</u>	...	143
