List of Figures:

Figure 1.1: River basins of Karnataka ................................................................. 3
Figure 1.2: Location map of the study area .......................................................... 6
Figure 2.1: Geological map of Karnataka (After Radhakrishna et al., 1991) ........ 13
Figure 2.2: Geology map of the study area ......................................................... 21
Figure 2.3: Structural map of the study area ....................................................... 26
Figure 2.4: Soil map of the study area ............................................................... 29
Figure 3.1: Monthly average relative temperature in °C of the study area (years 1990-2005) .................................................................................. 44
Figure 3.2: Monthly average relative humidity in % of the study area (years 1990-2005) .... 44
Figure 3.3: Monthly average wind speed of the study area (years 1990-2005) ........ 45
Figure 3.4: Station wise monthly average rainfall (mm) of the study area (years 1985-2005) 48
Figure 3.5: Annual rainfall from 1985-2005 .......................................................... 48
Figure 3.6: Analysis of average pre-monsoon rainfall (mm) of the study area using IDW method ............................................................................... 50
Figure 3.7: Analysis of South-West monsoon rainfall (mm) of the study area using IDW method ........................................................................ 51
Figure 3.8: Analysis of North-East monsoon rainfall (mm) of the study area using IDW method ........................................................................ 52
Figure 3.9: Analysis of annual rainfall (mm) of the study area using IDW method .... 53
Figure 3.10: Scatter plot for moving average of annual rainfall ............................. 56
Figure 3.11: Scatter plot of mean precipitation of three seasons ........................... 56
Figure 4.1: Drainage pattern of Lakshmantirtha basin .......................................... 60
Figure 4.2: Watershed boundary of Lakshmantirtha sub-basin ............................. 62
Figure 4.3: Geometric relationship between stream order, stream number and stream length .................................................................................. 70
Figure 4.4: The relationship among form factor, circularity ratio and elongation ratio 77
Figure 4.5: Scatter plot matrix shows the correlation between Fs and Dd .............. 81
Figure 4.6: Scatter plot shows the correlation between Dd and Lg ......................... 83
Figure 4.7: Cycle erosion of a basin (after Strahler, 1952) .................................... 92
Figure 4.8: The fitted equation of the hypsometric curves for the basin .............. 93
Figure 4.9: Hypsometric curve of the basin and its 26 watersheds ....................... 101
Figure 5.1: Geomorphology map of the study area ............................................. 117
Figure 5.2: Slope map of the study area ............................................................ 120
Figure 5.3: Drainage map of the study area ....................................................... 121
Figure 5.4: Lineament map of the study area .................................................. 125
Figure 5.5: Rose Diagram of Lineament of the study area ................................. 127
Figure 5.6: Screen shot of frequency distribution of lineaments in Rozeta software (v.2) 128
Figure 5.7: Lineament density map of the study area ....................................... 130
Figure 5.8: Contour and spot height in the study area ........................................... 132
Figure 5.9: TIN model of the terrain of the study area ........................................ 133
Figure 5.10: Raster model of the terrain of the study area ................................... 134
Figure 5.11: Exaggerated perspective view of DEM of the study area .................. 135
Figure 5.12: Exaggerated perspective view of DEM of the study area .................. 135
Figure 5.13: Land use/Land cover of the study area ......................................................... 139
Figure 5.14: Groundwater prospect map of the study area ............................................. 144
Figure 5.15: Box plot for pre-monsoon water level data ............................................... 149
Figure 5.16: Box plot for post-monsoon water level data .............................................. 150
Figure 5.17: Spatial distribution of water level during pre-monsoon ............................ 151
Figure 5.18: Spatial distribution of water level during post-monsoon ............................ 152
Figure 5.19: Grid deviation map of the study area ....................................................... 154
Figure 5.20: Scatter plot of water level data of pre-monsoon water level data .......... 159
Figure 5.21: Scatter plot of water level data of post-monsoon water level data .......... 160
Figure 6.1: Location map of the sampling points in the study area .............................. 164
Figure 6.2: Spatial distribution of TDS concentrations of groundwater during pre-monsoon season ........................................................................................................ 173
Figure 6.3: Spatial distribution of TDS concentrations of groundwater during post-monsoon season ........................................................................................................ 174
Figure 6.4: Spatial distribution of EC of groundwater during pre-monsoon season ...... 176
Figure 6.5: Spatial distribution of EC of groundwater during post-monsoon season ...... 177
Figure 6.6: Classification diagram for anion and cation facies in the form of major-ion percentages ................................................................................................................. 187
Figure 6.7: Trilinear diagram of groundwater during pre-monsoon) .............................. 188
Figure 6.8: Trilinear diagram of groundwater during post-monsoon ........................... 188
Figure 6.9: Wilcox's diagram for groundwater during pre-monsoon ............................ 190
Figure 6.10: Wilcox's diagram for groundwater during post-monsoon ........................ 190
Figure 6.11: Rating of Groundwater samples in relation to salinity and sodium hazard during pre-monsoon ......................................................................................... 193
Figure 6.12: Rating of Groundwater samples in relation to salinity and sodium hazard during post-monsoon ......................................................................................... 193
Figure 6.13: Mechanism controlling the chemistry of groundwater during pre-monsoon season ................................................................................................................. 198
Figure 6.14: Mechanism controlling the chemistry of groundwater during post-monsoon season ................................................................................................................. 199
Figure 6.15: Spatial distribution of TDS concentrations of surface water samples during pre-monsoon season ............................................................................................ 206
Figure 6.16: Spatial distribution of TDS concentrations of surface water samples during post-monsoon season ............................................................................................ 207
Figure 6.17: Spatial distribution of EC of surface water samples of the study area during post-monsoon season ............................................................................................ 209
Figure 6.18: Spatial distribution of EC of surface water samples of study area during post-monsoon season ............................................................................................ 210
Figure 6.19: Trilinear diagram of surface water during pre-monsoon ......................... 218
Figure 6.20: Trilinear diagram of surface water during post-monsoon ....................... 218
Figure 6.21: Wilcox's diagram of surface water during pre-monsoon .......................... 221
Figure 6.22: Wilcox's diagram of surface water during post-monsoon ....................... 221
Figure 6.23: USSL diagram of surface water during pre-monsoon ............................... 223
Figure 6.24: USSL diagram of surface water during post-monsoon ............................ 223
Figure 6.25: Scree plot for surface water (pre-monsoon) ............................................. 230
