ACKNOWLEDGEMENT

I gratefully acknowledge my indebtedness and express my deep sense of respect to my teacher Professor D. Banerjee, Ph.D., D.Sc., FNASc., C.Chem., FRSC (London), Sir Rashbehary Ghose Professor of Chemistry, Calcutta University, without whose blessings, stimulating encouragement, constructive suggestions and constant guidance the present research work could not have been carried out.

Words may fail to express my deep regards to my parents whose meticulous care, affection and inspiring blessings are the greatest resources of my life.

I am thankful to University Grants Commission for the fellowship awarded to me during the tenure of the work.

I convey thanks to my friends and colleagues who were ever ready with their friendly cooperations.

I am also gratefully indebted to Sm. L. Gangopadhyay for sketching the figures for this dissertation. Thanks are due to Mr. S. Bhattacharyya, Typist, for his friendly cooperation.
