P R E F A C E

THIS thesis is devoted to some biochemical studies on the effect of some cyclic and aromatic compounds on Vibrio cholerae and Vibrio parahaemolyticus.

Results of some of the investigations presented in this thesis have already been published in different scientific Journals, e.g. Proceedings of the 28th International Congress of Pure and Applied Chemistry, 1981, Vancouver, Canada, and Journal of Institute of Chemists (India). References to these publications have been included at the end of the thesis.

The work presented in this thesis was carried out in the Research Laboratory of the Department of Chemistry, Bethune College, Calcutta.

The author is greatly indebted to Dr. (Mrs.) D. Chakravarti, (Ex-Professor and Head of the Department of Chemistry, Bethune College, Calcutta), Member of P.S.C., West Bengal, for her guidance throughout the progress of this investigation. The author is also greatly indebted to Dr. P.C. Adhikari, Department of Biophysics, School of Tropical Medicine, Calcutta and to Dr. A.B. Banerjee, Reader, Department of Biochemistry, Calcutta University, for their advice and directions from time to time whenever necessary for the progress of this investigation.
The author also acknowledges her indebtedness to Dr. B.D. Chatterjee, Bacteriology Department of School of Tropical Medicine, Calcutta, for kindly providing the bacterial strains, and to Dr. D.L. Klayman, Head of the Organic Chemistry Section in the Division of Experimental Therapeutics, Walter Reed Army Institute of Research, Walter Reed Army Medical Centre, Washington for his kind gift of two compounds, carvacrol and diosphenol, and also to Dr. S.K. Das, Central Drug Laboratories, Calcutta, for his kind instructions.

The author is grateful to The Principal, Bethune College, and Dr. (Mrs.) R. Sur, present Head of the Department of Chemistry, Bethune College, Calcutta for providing all facilities for this work. She is also grateful to Dr. R.N. Chakravarti, Ex Director of I.I.E.M., Calcutta (present I.I.C.B., Calcutta).

Thanks are also due to Mr. P.K. Maiti, Chemical Engineering Department, Calcutta University, Dr. M.K. Roy Chowdhury and Mr. Arun Das Gupta of Bose Institute, Calcutta, Dr. (Mrs) B. Adhikari, (ex research student of Dr. D. Chakravarti), and Mr. N. Choudhury of Presidency College, Calcutta, for their ungrudging help and technical assistance.
