ACKNOWLEDGEMENTS

It gives me great pleasure and satisfaction to express my deep sense of gratitude and indebtedness to Dr. S.K. Banerjee, D.Sc., Scientist SE, Forest Soil Vegetation Survey (Eastern Region) Kote Bazar, Midnapore, West Bengal under whose able guidance, keen interest, personal care and constant encouragement the entire work of this thesis has been completed.

I am also thankful to Prof. S.K. Gupta, professor of Agricultural Chemistry and Soil Science, Calcutta University for his valuable suggestions, help and cooperation to accomplish this work.

I must thank the Head, University College of Agriculture, Calcutta University for extending laboratory facilities to carry-out this work.

I take this opportunity to extend my thanks to Dr. D.K. Pal, Senior Scientist, NBSS & LUP, Nagpur and Dr. S.K. Roy, Scientist, State Agricultural Depts., West Bengal for their inspiration and help in many ways during the course of work.

I am grateful to the Indian Council of Agricultural Research, New Delhi for providing necessary funds to carry out this research work.

Sincere thanks are due to Dr. S. Nath, Dr. P.K. Das, Mrs. T.L. Pillai, Ms. W. Rudra, Mr. S. Srinivas, Mr. Arvind Kumar, Mr. M. Wadodkar and other colleagues and friends for assisting me in many ways in this venture.

I must thank my Wife, Brothers and Sister for their encouragement and help to complete this work in time.

I must take this opportunity to express my deep sense of gratitude to my parents for their inspiration and blessings without which this work would not have been completed.

(CHANDRAN P.)
