Chapter-1

A Brief Literature Review on Amino Acid / Peptide Conjugated Heterocycles as Novel Class of Lead Molecules in Modern Drug Discovery

1.1. General	1-2
1.2. A Quick Overlook on the Biological Roles of Amino Acids, Peptides/Proteins and their Medicinal Application	2-8
1.3. Amino Acids and Peptides in Drug Discovery: <i>A Bird's Eye View</i>	8-14
1.4. Development of Amino acid / Peptide Conjugated Heterocycles as Novel Class of Lead Molecules in Modern Drug Discovery: <i>A Concise Review</i>	14-28
1.5. References	29-31

Chapter-2

Design, Synthesis and Biological Evaluation of Amino Acid Conjugated Heterocycle Derivatives

2.1. Introduction	32-64
2.2. Present Work	65-71
2.3. Experimental	72-109
2.4. Results and Discussion	110-113
2.5. Conclusion	114
2.6. References	115-120

Chapter-3

A Study on Antimicrobial Potency of Shorter Analogues of *Arg-Pro* Rich *Bac7* Conjugated Heterocycles

3.1. Introduction	121-127
3.2. Present Work	128-131
3.3. Experimental	132-145
3.4. Results and Discussion	146-147
3.5. Conclusion	148
3.6. References	149-150
