

LIST OF FIGURES

Fig. No.	Title	pp
R1	Hog plum tree	
R2	Hog plum fruits	
1.1	Schematic representation of sequential extraction (method I) of four different fruit powder	
1.2	Yield of the <i>Momordica cymbalaria</i> fruit extracts with different solvents.	
1.3	Yield of the wood apple fruit extracts with different solvents.	
1.4	Yield of the <i>Spondias mangifera</i> cv. Kasturi fruit extracts with different solvents.	
1.5	Yield of <i>Spondias mangifera</i> cv. Hal fruit extracts with different solvents.	
1.6	DPPH radical scavenging activity of <i>Momordica cymbalaria</i> fruit extracts	
1.7	DPPH radical scavenging activity of wood apple fruit extracts	
1.8	DPPH radical scavenging activity of <i>Spondias mangifera</i> cv. Kasturi	
1.9	DPPH radical scavenging activity of <i>Spondias mangifera</i> cv. Hal	
1.10	Schematic representation of sequential extraction (method II) of <i>Spondias mangifera</i> cv. Kasturi and <i>Spondias mangifera</i> cv. Hal. fruit powder	
1.11	Yield of <i>Spondias mangifera</i> cv. Kasturi and <i>Spondias mangifera</i> cv. Hal fruit extracts from extraction method II.	
1.12	DPPH Radical scavenging activity of <i>Spondias mangifera</i> var Kasturi and <i>Spondias mangifera</i> cv. Hal fruit extracts with different solvents.	
1.13	DPPH Radical scavenging activity <i>Spondias mangifera</i> var. Hal fresh fruit extracts.	
1.14	Antioxidant activities of <i>Spondias mangifera</i> cv. Hal fruit extracts.	
1.15	EC ₅₀ value for DPPH Radical scavenging activity of methanol extract of <i>Spondias mangifera</i> cv. Hal.	
1.16	Platelet-aggregation inhibitory activity of wood apple fruit extracts.	
1.17	Platelet-aggregation inhibitory activity of <i>Spondias mangifera</i> var. Kasturi fruit extracts.	
1.18	Platelet-aggregation inhibitory activity of <i>Spondias mangifera</i> var. Hal fruit extracts.	
1.19	Platelet-aggregation inhibitory activity of <i>Spondias mangifera</i> var. Hal fruit extracts against different inducers.	
1.20	Antifungal activity of <i>Momordica cymbalaria</i> fruit extracts .	
1.21	Antifungal activity of wood apple fruit extracts.	
1.22	Antifungal activity of fruits of <i>Spondias mangifera</i> var. Hal extracts.	
2.1	Schematic representation for isolation of platelet-aggregation inhibitory compound from ethyl acetate extract of <i>Spondias mangifera</i> fruit.	
2.2	Structure of Glycospondin.	
2.3	Schematic representation for isolation of antioxidant compound from methanol extract of <i>Spondias mangifera</i> fruit.	
2.4	DPPH radical-scavenging activity of different fractions obtained from methanol extract by three steps of column chromatography	
2.5	Structure of Spondiol.	
2.6	Platelet-aggregation inhibitory activity of glycospondin.	
2.7	Platelet-aggregation inhibitory activity of Spondiol.	
3.1	Growth and development of <i>Spondias mangifera</i> fruit.	

Fig. No.	Title	pp
3.2	Transverse and vertical sections of <i>Spondias mangifera</i> fruit.	
3.3	Changes in weight of <i>Spondias mangifera</i> during fruit development.	
3.4	Changes in diameter of <i>Spondias mangifera</i> during fruit development.	
3.5	Changes in texture in <i>Spondias mangifera</i> during fruits development	
3.6	Changes in Spondiol during fruit development of <i>Spondias mangifera</i> fruit.	
3.7	Changes in total soluble solids and titrable acidity in <i>Spondias mangifera</i> during fruit development	
3.8	Changes in pH and titrable acidity in <i>Spondias mangifera</i> during fruit development	
3.9	Changes in total sugar and reducing sugar content in <i>Spondias mangifera</i> during fruit development	
3.10	Changes in total protein content in <i>Spondias mangifera</i> during fruit development	
3.11	Changes in total phenolic content in <i>Spondias mangifera</i> during fruit development	
3.12	Changes in ascorbic acid content in <i>Spondias mangifera</i> during fruit development	
3.13	Changes in colour readings of <i>Spondias mangifera</i> during fruit development.	
3.14	Changes in chlorophyll pigments in <i>Spondias mangifera</i> during fruit development	
3.15	Changes in total chlorophyll and total carotenoids in <i>Spondias mangifera</i> during fruits development	
3.16	Changes in rate of respiration in <i>Spondias mangifera</i> during fruit development	
4.1	Changes in texture of <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.2	Changes in Spondiol of <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.3	Changes in pH of <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.4	Changes in titrable acidity of <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.5	Changes in total soluble solids <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.6	Changes in total sugar of <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.7	Changes in reducing sugar of <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.8	Changes in total protein content of <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.9	Changes in total phenolics <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.10	Changes in ascorbic acid content of <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.11	Changes in total chlorophyll of <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.12	Fig. 4.12: Changes in carotenoids of <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.13	Fig. 4.13: Changes in rate of respiration of <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.14	Fig. 4.14: Changes in physiological loss of water (PLW) of <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.15	Fig. 4.15: Percentage of spoilage in <i>Spondias mangifera</i> fruits of different maturities during storage at ambient temperature.	
4.16	Fig. 4.16: Internal browning in fruits of <i>Spondias mangifera</i> causing spoilage during storage	
4.17	Fig. 4.17: Pathological diseases A: <i>Aspergillus niger</i> and B: <i>Penicillium expansum</i> of <i>Spondias mangifera</i> fruit causing spoilage during storage.
