

ACKNOWLEDGEMENTS

The author wishes to express her deep sense of gratitude to Dr. B.M. Koley, Reader in Physiology, Calcutta University, for whose wise guidance the work of the thesis has been completed.

The author is indebted to Prof. S.R. Maitra, the Head of the Department of Physiology, for his valuable advice, suggestion and keen interest in the work. Grateful thanks are extended to Prof. B.N. Ghosh of the Department of Pure Chemistry, Calcutta University, for his suggestion and advice during the course of investigation.

The author feels it very deeply while mentioning the co-operation and suggestion rendered by Dr. S.N. Roy, Dr. M. Ghoshal, Dr. Chandidas Dey, Sri Suradish Datta, Dr. Gnanankur Bag, Sri Kalidas Saha, Sri Tapan Guha, Dr. (Mrs.) Purnima Roy, Dr. (Mrs.) Juthika Koley, Dr. (Miss) Sabita Majumdar, Sm. Swapna Ghosh and Sm. Jayasree Basu.

Sincere thanks are due to Sri Ranajit Bhattacharya for his assistance in photography, Sri Paresh Chandra Roy and Sri N.N. Ghosh for numerous technical cooperation and help during the progress of the work of the thesis.

Lastly, mention is made of Mrs. Kamala Banerjee, mother, Mr. D.P. Mukherjee, uncle, and Mr. B.P. Banerjee, husband, who remaining behind the facade have acted as guiding source of inspiration for the work of thesis.

January 1974
