CHAPTER IV :	
Certain Pharmacological Effects of Cobra and Russell's viper Venoms                     ...     ...	48-79
<u>Section A</u>	
Effect of Cobra and Russell's viper Venom Solutions on Toad's Perfused Heart                     ...     ...	48-55
Methods and Materials                     ...     ...	49
Results                     ...     ...	49
Discussion                     ...     ...	53
<u>Section B</u>	
Effect of Cobra and Russell's viper Venom Solutions on Blood Pressure and Respiration of Anesthetized Cats     ...	56-65
Methods and Materials                     ...     ...	56
Results                     ...     ...	57
Discussion                     ...     ...	61
<u>Section C</u>	
Electrocardiographic Appearances in Rabbits after Administration of Cobra and Russell's viper Venom Solutions	66-79
Methods and Materials                     ...     ...	66
Results                     ...     ...	67
Discussion                     ...     ...	75

CHAPTER V :	
Isolation and Physiological Studies of the different Factors of Cobra and Russell's viper Venom heated at 100°C for 30 minutes	80-93
<u>Section A</u>	
Isolation of different Factors of Cobra and Russell's viper Venoms (heated at 100°C for 30 minutes) by	
Sephadex G-50 Gel Filtration	80-82
Methods and Materials	81
Results	82
<u>Section B</u>	
Some Physiological Activities of Isolated Factors of Cobra Venom Solution heated at 100°C for 30 minutes	83-87
Some Physiological Activities of Isolated Factors of Russell's viper Venom heated at 100°C for 30 minutes	87-90
Discussion	90
SUMMARY AND INTEGRATED DISCUSSION	94-104
CONCLUSION	105
REFERENCES	107-115
