ACKNOWLEDGEMENT

I take this opportunity to place on record my deep sense of gratitude to Dr. Anne Roe for permitting me to modify the Parent-Child Relations (PCR) Questionnaire for my research. As far as my information goes there is no questionnaire for measuring parent-child relationship in our country. Dr. Roe's cooperation and help in my study are gratefully acknowledged.

My sincere thanks are due to Dr. B.S. Schaefer, National Institute of Mental Health, Maryland, Prof. J.R. Hurley, Michigan State University, Prof. W.R. Morrow, University of Missouri, who gave their valuable opinion on the problem of the present investigation. Their concrete suggestions helped the present investigation much to investigate the problem of research.

Prof. S.K. Bose, Head of the Department, Calcutta University (now retired) was Supervisor of my work which could not have been completed without his guidance. I am under deep obligation to him.

I am indebted to the School authorities who allowed me to administer the tests in their institutions. Without their active cooperation the present piece of work would not have been completed.
Also I owe a debt of gratitude to the boys who so enthusiastically cooperated in this study.

Dr. (Mrs.) Maya Deb, Lecturer of Psychology, Calcutta University, Dr. D. Banerji, Assistant Research Officer, All India Institute of Hygiene & Public Health, Sree A.K. Sirkar, my former teacher and Dr. A.K. Mallick, U.C.C. Senior Research Fellow, benefited me by their valuable suggestions on the design of the work and correction of the manuscript.
