

## ACKNOWLEDGEMENT

It is an immense pleasure and opportunity for me to express my deep regards and sincerest gratitude to Dr. B. Bhattacharya, Professor in Agronomy and Dean, faculty of Agriculture and Veterinary Sciences, University College of Agriculture, Calcutta University, for erudite valuable guidance, timely help and advice throughout the course of investigation and preparation of this thesis.

I must express my sincere thanks to Dr. S.N. Tripathi, Senior Scientist and ex. officer-in-charge of the C.T.R.I.R.S. Dinahata (Cooch Behar), W.B. who provided me all facilities and constant encouragement, timely help and local supervision during the course of experimentation.

I am also deeply grateful to Director, C.T.R.I. Rajahmundry (I.C.A.R.) for providing facilities and permission to conduct experiments for Ph.D. thesis work.

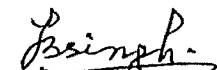

I would like to express my solemn gratitude to Prof. N.C. Chattopadhyay, Head, University College of Agriculture, Calcutta University for providing me necessary laboratory facilities.

I am thankfull to Mr. Rantu Sen for typing job of the entire thesis.

I am ever indebted to my parents for their unlimited inspiration to every step of my studies.

At last but not the least my heartiest thanks goes to my wife Mrs. Malti Singh for her immense enthusiasm in continuing my studies.

Calcutta,  
Dated : 25th January, 1995.

  
BARE LAL SINGH
