ACKNOWLEDGEMENTS

With pleasure I am duty bound to express my deep gratitude, allegiance and best regards to my guide Professor C. G. Chakrabarti, S. N. Bose Professor of Theoretical Physics, Department of Applied Mathematics, University of Calcutta for his guidance, supervision, valuable advices and hearty co-operation for the preparation and submission of this thesis.

I would like to express my indebtedness and high esteem also to Prof. M. Dutta, Former Professor-in-Charge, S. N. Bose Institute of Physical Science, University of Calcutta, Prof. M. R. Gupta, Prof J.N. Das, Prof. A. Gupta, Prof. S.C.Bose, all of the Department of Applied Mathematics, University of Calcutta for their encouragements, valuable counsels and sincere co-operation in my 'research-works'.

Thanks to the Calcutta Mathematical Society, Indian Statistical Institute (Calcutta), Saha Institute of Nuclear Physics (Calcutta) for their liberal co-operation in using their library books and journals every now and then. Thanks to the
council of Scientific and Industrial Research, India, for their financial support throughout the research work. Heartfelt thanks to my friends and colleagues, specially to Lipika Mullick, Samita Seal and Arani Chakravorty for their sincere cooperation and all out help during my research works. Thanks to Mr. Sandeep Ganguly, Amit Dey for typing the thesis attentively.

Deep regards and homage to my parents with profound love and thanks to my spouse whose affection and inspiration constantly inspired me to carry on my works.

The whole work is dedicated to my little sweet son 'Tatan' whose silent request from his cradle makes me possible to prepare the thesis rapidly.
