ACKNOWLEDGEMENT

The present study has been undertaken in partial fulfilment of the requirements of the Ph.D. degree in Arts (Economics) of the University of Calcutta. The study was made under the general supervision of Prof. R. Datta, Professor of Economics, Calcutta University. A number of eminent scholars also helped me in clarifying concepts, developing appropriate methods and applying quantitative techniques. I would like to take this opportunity to express my gratitude to Prof. A. Sen, Kalyani University, Prof. N. Bhattacharyya and Dr. D. Kundu of the Indian Statistical Institute, Calcutta, and Dr. A.M. Goon, Director, Centre for Statistics, North Eastern Hills University, Shillong, for their kindness and patience shown to me over the years during which the study was prepared. A preliminary draft of the scheme of the dissertation was presented by me at a seminar of the Economics Department, Calcutta University. I am also grateful for the constructive comments made by Prof. V. Mukherjee, Professor of Economics, Calcutta University and Prof. S.K. Bhattacharyya, at the present moment Vice-Chancellor, Calcutta University. I take this opportunity to thank Dr. S. Banerjee of the Department of Computer Science Centre, Calcutta University, in allowing me to have the facilities of the Computer. I also acknowledge my gratitude to Prof. A. Ghosh, Head of the Department of Economics, Calcutta University for sustained encouragement and help.
