

## ACKNOWLEDGEMENTS

*After the early demise of my father, if it were not for the sacrifice, patience, love and support of my mother, it may not have been possible for me to even have completed my basic education. I, therefore dedicate this thesis, as a small token of my appreciation, for her painstaking efforts and guidance in moulding me into what I am today.*

*I wish to proffer my thanks and gratitude to Dr.Kalyan Banerjee, Director, National Institute of Virology (NIV) for permitting me to work and avail of all the facilities at NIV. I also thank him, for his recommendations, which enabled me to obtain an ICMR fellowship and complete my thesis. In spite of his busy schedule, Sir was able to spare time for his suggestions and meticulous correction of this manuscript.*

*I am greatly indebted to Dr.D.A.Gadkari, Deputy Director National AIDS Research Institute (NARI), under whose guidance this project was initiated. Dr.Gadkari was instrumental in introducing me into the field of Virology and enabling me to gain first hand experience working with many of the biochemical techniques. I thank him for being patient and more importantly for boosting-up my confidence from time to time.*

*The help, suggestions and critical discussions of Dr.C.N.Dandawate, Dr.M.M.Gore, Dr.J.P.Thakare and Dr.Cecilia D. is greatly apprized. A major portion of this work involved experimentation in animals. I am grateful to Dr.M.K.Goverdhan and staff for availing the inhouse animal facilities. I would like to specially thank Mr.S.Naik, Mr.R.M.Kolhapure, Mr.C.D.Tupe, Mr.Cheliah and Mr.S.Gangaram for taking a keen interest and making available the animals. But for the expertise of Mr.Anand Singh, Mr.T.L.G.Gangadhar, Mr.B.D.Walhekar and Mr.V.A.Sonawane, it would not have been possible to carry out the serological tests. I thank them for their unconditional and everwilling help.*

*I wish to acknowledge the help from the entire library staff. Mr.S.N.Singh, Mr.Domenic Fernandez, Mrs.V.V.Yewale, Mrs.A.Rethamma, Ms.M.B.Thakkar and others rendered their full co-operation in obtaining books and references from within and outside NIV. The help and co-operation from Ms.S.P.Verma and in particular Mr.S.S.Bedekar in utilizing the excellent computer facilities is greatly appreciated. I also wish to put a record for my gratitude to the staff members of the photography section, especially Mr.S.Deshpande for rendering their expertise in the preparation of this thesis.*

*Special thanks are due to Paresh, Smita, Leena and Shirish for critical discussions and assistance in the laboratory. The help and encouragement at many times from friends, Sathe, John, Mr.Dedge, Smita M., Swati T., Jyotsna J. and Leena C. is also appreciated. I would fail in my duty, if I do not thank Mrs.S.A.Sarathi, Mr.V.M.Ayachit, Mrs.V.J.Lad and Mr.S.V.Naik for the excellent technical assistance. The co-operation from other staff members from the Division of Biochemistry, Virology and Immunology needs to be*

*acknowledged. Mr.Sanjay Dorje from Serum Institute of India - Ltd. , was kind enough to carry out the initial analysis of the NS1 proteins on the HPLC columns - his help is appreciated.*

*I take this opportunity to remember Late Ms.Frenny Watchmaker (Library) and Late Mr.Bashir Shaikh (Central Serology). It would have done them proud to see that the manuscript has been prepared. The continued help and encouragement from other NIV scientific and administrative staff is greatly acknowledged.*

*I sincerely and whole-heartedly would like to thank Mrs.A.V.Shendrikar for her cheerfulness and forbearance during the typing of this thesis. I shall always remain indebted in my thanks for her meticulous typing.*

*In the ups and downs of my work, during times of frustrations and depressions, be it rain or sunshine, one person always stood by me to boost-up my morale and remind me constantly that `targets had to be achieved'. I take this opportunity to express my appreciation to this wonderful person, my wife, `Sim'. If, it were not for the confidence she had in me, I am not sure if, I would have come through, preparing this thesis. I would also like to thank all the members of my family and my `IN-LAWS' for bearing with me during times of uncertainties during my Ph.D. Their co-operation and blessings is greatly appreciated.*

*During the tenure of my Ph.D. work, I was a recipient of the Senior Research Fellowship awarded by the Council of Scientific and Industrial Research (CSIR) and the Indian Council of Medical Research (CSIR). I duly acknowledge the financial support from both the organizations.*

*Eddy Sayeed*
