

LIST OF TABLES

Table No.	Title	Page
1.	Classification of flaviviruses into major antigenic complexes	4
2.	List of few major JE outbreaks investigated by NICD.	19
3.	Characterization of anti-JEV IPF	49
4.	Molecular weight determination of rNS1-2A protein by SDS-PAGE	52
5.	Estimation of rNS1-2A protein content by densitometric scanning	56
6.	Optimization of rNS1-2A expression by ELISA using anti-JEV IPF	59
7.	Optimization of recombinant NS1-2A protein expression by ELISA using anti-NS1 specific MAb	62
8.	Purified rNS1-2A protein estimation by densitometric scanning	67
9.	Characterization of rabbit antiserum against rNS1-2A protein	85
10.	Characterization of anti rNS1-2A and anti JEV-IPF in plaque reduction neutralization test (PRNT)	86
11.	Calibration curve to determine molecular weight of monomeric and dimeric NS1 and NS1' proteins by SDS-PAGE	102
12.	Calibration curve to determine molecular weight of peaks resolved on FPLC : JEV infected cell lysate	116
13.	Calibration curve to determine Mw of peaks resolved on FPLC : JEV infected mouse brain suspension	122
14.	Characterization of BALB/c mouse serum immunized with JEV prior to hybridoma preparation	143
15.	Characterization of monoclonal antibodies (MAbs) against NS1 protein of JEV	144
16.	Epitope mapping of rNS1-2A protein by ELISA : Additivity test	155
17.	Ability of NS1 specific MAb to bind free NS1 protein in solution	159

Table No.	Title	Page
18.	Standardizing elution conditions for dissociating antigen-antibody complexes by capture ELISA	160
19.	Protection studies of mice immunized with different dilutions of Kasauli vaccine with or without rNS1-2A protein on challenge with 100 LD ₅₀ of JEV	166
20.	Protection studies of mice immunized with different dilutions of Kasauli vaccine with or without rNS1-2A protein on challenge with 1000 LD ₅₀ of JEV	167
21.	Seroresponse of mice immunized with different immunogens : reactivity in ELISA with purified JEV	168
22.	Seroresponse of mice immunized with different immunogens :Reactivity in ELISA with rNS1-2A protein	169
23.	Detection of NS1 and E protein in Kasauli vaccine, JEV infected TCF and JEV infected mouse brain suspension by capture ELISA	171
24.	Seroresponse of mice immunized with different dilutions of Kasauli vaccine with or without rNS1-2A protein : before and after challenge with JEV in haemagglutination inhibition and complement fixation tests	172
25.	Sequence homology of flaviviral NS1 protein at amino acid level	186
