

LIST OF FIGURES

Figure No.	Title	Page
1.	Schematic representation of Japanese encephalitis virion	5
2.	Genomic organization of flaviviral RNA.	8
3.	Model to depict folding of flavivirus envelope protein	13
4.	Transmission cycle of JE virus in nature.	23
5.	Schematic representation of pATH NS1-2A recombinant clone	35
6.	Organization of tryptophan operon	37
7A.	Secondary structure control of tryptophan biosynthesis	38
7B.	Attenuation control of tryptophan biosynthesis	39
8A,B.	Optimization of rNS1-2A protein induction	51
8C.	Molecular weight determination of rNS1-2A protein by SDS-PAGE.	53
9A.	Purification of rNS1-2A protein	54
9B.	Densitometric scan analysis to determine relative proportion of rNS1-2A protein in insoluble protein fraction.	55
10.	Optimization of rNS1-2A protein expression by ELISA using anti-JEV IPF	58
11.	Optimization of rNS1-2A protein expression	60
12.	Optimization of rNS1-2A protein expression by ELISA using NS1 specific MAb	61
13.	Optimization of rNS1-2A protein expression with anti-NS1 specific MAb	63
14A.	Estimation of rNS1-2A protein after purification by densitometric scanning	65
14B.	Estimation of rNS1-2A protein after purification by densitometric scanning	66
14C.	Standard calibration curve : rNS1-2A protein quantitation by densitometric scanning	68
15.	Reactivity of anti rNS1-2A polyclonal serum in immunofluorescence (IF) test. (A) Cytoplasmic IF (B) Surface IF	87

Figure No.	Title	Page
16.	Reactivity of anti-E specific MAb (Hx-1) in immunofluorescence (IF) test. (A) Cytoplasmic IF (B) Surface IF	88
17.	Reactivity of anti-JEV IPF in immunofluorescence test (A) Cytoplasmic IF (B) Surface IF	89
18.	Reactivity of anti rNS1-2A, anti JEV IPF and anti E MAb in Western blot	90
19.	Time course study of JE virus polypeptide synthesis.	93
20.	Time course study of NS1 polypeptide synthesis	94
21.	JE virus polypeptide analysis by radioimmunoprecipitation	95
22.	Sensitivity of NS1 protein to SDS-treatment	96
23.	Sensitivity of NS1 protein to 2-mercaptoethanol treatment	97
24.	Sensitivity of NS1 protein to treatment with 5 M Guanidine-hydrochloride (Gu-HCl)	99
25.	Sensitivity of NS1 protein to treatment with 8 M urea	100
26.	Sensitivity of NS1 protein to heat treatment	101
27.	Standard graph to determine molecular weight of NS1 dimers and monomers by SDS-PAGE	103
28.	Sensitivity of NS1 protein to pH treatment	104
29.	Sensitivity of NS1 protein in JEV infected suckling mouse brain suspension to SDS and 2-mercaptoethanol treatment	105
30.	Phase partitioning of NS1 protein of JEV in Triton X-114 detergent	107
31.	Sensitivity of NS1 protein to digestion with endoglycosidase H and F	109
32.	Binding of NS1 protein onto anion-exchanger beads	112
33.	Analysis of protein fractions eluted with 150 mM NaCl from anion-exchanger	113
34.	Analysis of protein fractions eluted with 150 mM NaCl from anion-exchanger	114

Figure No.	Title	Page
35A.	Resolution of NS1 protein fraction eluted from anion-exchanger by gel filtration (FPLC)	115
35B.	Molecular weight determination of peaks resolved on FPLC : Standard calibration graph	117
36A.	Western blot analysis of NS1 protein eluted from FPLC	118
36B.	Analysis of NS1 protein eluted from the void-volume of FPLC	119
37A.	Resolution of JEV infected mouse brain suspension by gel filtration (FPLC)	121
37B.	Molecular weight determination of peaks resolved on FPLC :standard calibration graph	123
38.	Western blot analysis of the peaks from FPLC : JEV infected mouse brain suspension	124
39.	Reactivity of NS1 MAb in Western blot assay	145
40A.	Partial purification of NS1 protein from JEV infected PS cells by preparative SDS-PAGE; Coomassie blue staining of analytical SDS gel	146
40B.	Partial purification of NS1 protein from JEV infected PS cells by preparative SDS-PAGE; Western blot analysis : probed with anti-JEV IPF.	147
40C.	Partial purification of NS1 protein from JEV infected PS cells by preparative SDS-PAGE; Western blot analysis : probed with anti-rNS1-2A serum.	148
41.	Reactivity of anti-NS1 specific monoclonal antibodies in immunofluorescence	152 153
42.	Epitope map of rNS1-2A protein : Schematic representation	157
43A.	Purification of NS1 protein by immuno-affinity chromatography : Silver staining of SDS gel	161
43B.	Purification of NS1 protein by immuno-affinity chromatography : Western blot analysis	161
44.	WHO program for vaccine development : Strategic plan for dengue	180
