

A C K N O W L E D G E M E N T

The present thesis embodies the results of research work performed by the author in the Chemistry Department, North Bengal University, Darjeeling, India.

The author takes the first opportunity to express his gratefulness to Dr. A.K. Ghosh, M.Sc., D.Phil, Professor of Chemistry, North Bengal University for his continuous interest and active guidance throughout the work.

The author is thankful to Prof. B.K.Das, D.Sc., Professor of Chemistry, North Bengal University, for his keen interest and advices.

The author is also thankful to Dr. S.Das, Instrumentation Officer, North Bengal University, for his encouragement and valuable suggestions.

Thanks are due to RSIC Chandigarh for the analysis of the samples, Dow and M & T Chemicals, U.S.A. for supplying the miticide 'Plictran' as a token of gift.

The author is very much thankful to Mr. Bimal K. Bhattacharya, Miss S. Misra, Mr. N. Sarma for their generosity and the patience and enthusiasm they have shown to solve various problems in every possible way during the entire period of research work.

The author likes to thank to his fellow research workers, A. Adhikari, S. Dutta who have constantly helped the author during

(II)

the entire period of research work. Specific thanks are due to Mr. M. Chakraborty for typing the manuscript and to Mr. and Mrs. J. Dasgupta for their assistance in preparing the manuscript.

The author is thankful to the Department of Environment, Government of India for providing the research fellowship and to the authorities of the North Bengal University for laboratory, library and other facilities.

Finally, the author expresses his deep gratitude and indebtedness to his parents for their constant inspiration.
