ACKNOWLEDGEMENT ..	I
SUMMARY ..	III
<u>Introduction</u> ..	1
Mode of action of Organotin Compounds	7
Toxicity of Organotin Compounds	10
Environmental impact of Organotin Compounds	17
Biological application of Organotin Compounds	22
Miticidal activity of Organotin Compounds	30
Ovicidal activity of miticides	56
<u>Scope and Aims</u> ..	58
<u>Materials and Methods</u> ..	64
1) Preparation of starting materials	
i) <u>bis</u> (Tricyclohexyltin) oxide	64
ii) Oxalyl <u>bis</u> -N-phenyl hydroxamicacids	64
iii) Succinyl <u>bis</u> -N-phenyl hydroxamic acids	65
iv) Glutaryl <u>bis</u> -N-phenyl hydroxamic acids	65
2) Preparation of Organotin Compounds	
i) <u>bis</u> (Tricyclohexyltin)succinyl <u>bis</u> -N-phenyl hydroxamate	65
ii) <u>bis</u> (Tricyclohexyltin) glutary <u>bis</u> -N-phenyl hydroxamate	66
iii) Dicyclohexyltin oxalyl <u>bis</u> -N-phenyl hydroxamate ..	66
iv) Tricyclohexyltin-N-hydroxy phthalimide	66
v) Tricyclohexyltin-N-hydroxy succinimide	67

	Page
vi) Tricyclohexyltin diphenyl carbazone	67
vii) Tricyclohexyltin oxine	67
viii) Tricyclohexyltin phthalimide	68
3) Determination of acaricidal activity	
i) Collection of specimens	68
ii) Mounting for microscopical examination	68
iii) Identification ..	69
iv) Rearing ..	69
v) Preparation of the test solution	69
vi) Slide-dip method for contact toxicity assessment ..	69
vii) Method for assaying stomach toxicity	71
viii) Method for assaying contact plus stomach toxicity ..	71
Determination of LC ₉₅ and LC ₅₀	71
Method for assaying ovicidal activity	72
<u>Results and Discussion</u>	
Contact toxicity ..	73-104
Contact plus stomach toxicity	105-144
Stomach toxicity ..	145-184
Ovicidal toxicity ..	185-188
<u>Conclusion</u> ..	188
References ..	198
