CONTENTS

INTRODUCTION

1 - 8

CHAPTER - I

9 - 28

PHYSICAL SET-UP

1.1 Location
1.2 Geological Structure
1.3 Climatic Conditions
1.4 Flora
1.5 Pedeogenetic Conditions

CHAPTER - II

29 - 47

PHYSIOGRAPHIC REGIONS; DRAINAGE

NETWORK AND LANDFORMS

2.1 Introduction
2.2 Physiographic Regions
2.3 Drainage System
2.4 The Geomorphic Processes
2.5 Landforms
CHAPTER - III

NETWORK ANALYSIS

3.1 Introduction
3.2 Stream Ordering and Stream Numbers
3.3 Bifurcation Ratio
3.4 Law of Stream Number, Stream Length, Basin Area, Allometric Growth
3.5 Geometric properties of the open links
3.6 Geometry of the shape of close links

CHAPTER - IV

DRAINAGE DENSITY, DRAINAGE TEXTURE AND STREAM FREQUENCY

4.1 Introduction
4.2 Drainage Density - Methodology, Frequency Analysis, Spatial Analysis
4.3 Drainage Texture - Methodology, Spatial Variation of Drainage Texture
4.4 Stream Frequency - Methodology, Spatial Analysis of Stream Frequency
CHAPTER - V

RELIEF ANALYSIS

5.1 Introduction
5.2 Hypsometric Analysis
5.3 Altimetric Analysis
5.4 Absolute Relief
5.5 Relative Relief - Frequency Analysis,
Spatial Variation in Relative Reliefs
5.6 Slope Analysis - Angle Frequency and
Spatial Variation in Slope
5.7 Dissection Index - Methodology and Spatial
Variation in Dissection Index
5.8 Profile Analysis and Erosion Surfaces

CHAPTER - VI

CORRELATION ANALYSIS OF
MORPHOMETRICAL VARIABLES

6.1 Introduction
6.2 Network Relationship
6.3 Basin Perimetre, Basin Area and
Basin Length
6.4 Relative Relief and other variables
6.5 Average Slope and other variables
6.6 Dissection Index and other variables
6.7 Drainage Density, Drainage Texture, Stream Frequency and other variables

CHAPTER VII

CONCLUSIONS AND SUGGESTIONS

BIBLIOGRAPHY

PLATES
