ACKNOWLEDGEMENT

It is a matter of great pleasure to convey my deep sense of acknowledgement and sincere thanks to my teachers and friends. As I pick up my pen to write this page a galaxy of names hovers over my mind. The most venerated among them is my supervisor, Dr. V. K. Jain. I am highly indebted to him for persistent guidance and encouragement throughout the course of research. His friendly attitude and personal care were an asset to me.

I am highly thankful to Prof. S. Chopra, I.I.T., Delhi, for providing his lab to carry out my research work. He was always ready to help and clear the doubts that cropped up during the experiments. Again I would not be doing justice if I fail in recording my gratitude to Dr. H. B. Bohidar and Sidharth, SPS, J.N.U., for their cooperation from time to time. Thanks also go to Mr. B. B. Prasad, J.N.U., who helped me a lot while using VAX facility of the centre:

I think that words cannot be sufficient to acknowledge the help of my friend Mansoor, who was always there to take me out of the mess, a regular feature during last days of the work.

Words are inadequate to acknowledge my friends Servpriya, Manoj, Rajesh, Ramasare, Vinky, Sanjay, Vinod, Anand, Suneel and Karuna who always stood by me through thick and thin.

Finally I would like to thank Dean, SES, J.N.U., and C.S.I.R. for providing me the facilities and financial assistance to carry out my research.

RAVINDRA PRATAP SINGH
